3. Statistical processing

3.1. Source data			
a) Use of subsamples to survey structural variables (wave approach) <i>(Only for countries using a subsample for yearly variables)</i>			
Wave(s) for the subsample	Size of sub-sample in case of a wave approach (number of persons)		
Not necessary	The survey was carried out throughout the entire sample of the second quarter of 2016		
Do the annual core weights apply? (Y/N)	Do the quarterly core weights apply? (Y/N)	Do specific weights for the AHM apply? (Y/N)	If specific weights were applied, please give a brief description of the calculation method
N	Y	N	
b) Use of administrative data (C.1)			
Variables	Percentage of answers derived from administrative sources, in total number of answers (%) - data unweighted		If administrative data are used, please briefly indicate the source
WORKEXP	0%		
WORKSTUD	0%		
ADDLEVEL	0%		
DROPREAS	0%		
LEAVDATE	0%		
NCONREAS	0%		
SUPPORT	0%		
FINDMETH	0%		
OKLEVEL	0%		
MOVE4JOB	0%		
CMT4JOB	0%		
3.2. Frequency of data collection			
[Not requested]			
3.3. Data collection			

Data collection method (CAPI, CATI, etc; if mixed modes, indicate mode and % of interviews under each mode)	Is the module questionnaire separated from the LFS core questionnaire, i.e. asked after all core questions ? (Y/N)	Is the participation voluntary or compulsory?
PAPI	Y	Voluntary

4. Quality management

4.1. Quality assurance

[Not requested]

4.2. Quality management - assessment

a) Description of problems that occurred while validating / analysing the AHM data

General:	
By variable:	
<i>WORKEXP</i>	No problems
<i>WORKSTUD</i>	Variable is filtered to much by <i>WORKEXP</i> ; the results cannot be interpreted as "persons who received practical instruction during studies"
<i>ADDLEVEL</i>	Very low number of persons who started another level of education after completing the highest one
<i>DROPREAS</i>	Results are not reliable due to the narrow filter
<i>LEAVDATE</i>	Results are not reliable due to the narrow filter
<i>NCONREAS</i>	No problems
<i>SUPPORT</i>	No problems
<i>FINDMETH</i>	No problems
<i>OKLEVEL</i>	No problems
<i>MOVE4JOB</i>	No problems
<i>CMT4JOB</i>	No problems

b) Recommendations for improvement of an AHM with the same topic in the future

General:	
By variable:	
<i>WORKEXP</i>	Order of variables (and questions) <i>WORKEXP</i> and <i>WORKSTUD</i> should be changed. In this way we can get information on the number of persons who get practical instruction during studies + those working outside curriculum
<i>WORKSTUD</i>	Order of variables (and questions) <i>WORKEXP</i> and <i>WORKSTUD</i> should be changed. In this way we can get information on the number of persons who get practical instruction during studies + those working outside curriculum
<i>ADDLEVEL</i>	This variable should be dropped
<i>DROPREAS</i>	This variable should be dropped
<i>LEAVDATE</i>	This variable should be dropped
<i>NCONREAS</i>	-
<i>SUPPORT</i>	-
<i>FINDMETH</i>	-
<i>OKLEVEL</i>	-

5. Relevance**5.1. Relevance - User Needs**

a) Module and needs at national level

The module meets any other information needs at the national level (e.g. for policy makers, other stakeholders, media and academic research).

Yes

b) Additional variables in the AHM questionnaire

Number of additional questions used to ask additional variables or answer categories in the field of this AHM, which are going beyond those defined in the regulation

No additional questions

Brief description of the additional variables collected

Not necessary

5.2. Relevance - User Satisfaction

[Not requested]

5.3. Completeness

[Not requested]

5.3.1. Data completeness - rate

[Not requested]

6. Accuracy and reliability**6.1. Accuracy - overall**

6.3.1.2. Common units - proportion

[Not requested]

6.3.2. Measurement error

a) Proxy interviews

Are proxy interviews allowed for the AHM? (Y/N)

Y

b) Testing of the questionnaire

Was the AHM questionnaire tested in your country? (Y/N)	If Yes: which test methods applied; no. of test persons/respondents	If Yes: short description of testing (please report discovered problems in item d) below (P.1) and consequences for applied concepts or questions in section 8.1 Comparability - geographical (C.3 or C.4))
Y	12 respondents, informal test	Test was done in order to have a final review before printing. The purpose was to discover any skipping problems, wording mistakes etc.

c) Training of interviewers

Error source	Brief comments
Special training on the ad hoc module? (Y/N)	Y
Written instructions? (Y/N)	Y
Debriefing with interviewers? (Y/N)	N
Comments (other)	-

d) Description of problems experienced while implementing (incl. pre-testing and translating) the AHM into the national survey / questionnaire (P.1)

(this could apply to e.g. comprehension of question wordings, concepts or reference periods, the retrieval or processing of the corresponding information by the respondent, if questions are sensitive or effected by social-desirability, if the answer categories are adequate, if preceeding questions have an effect, if routing or filtering is problematic, etc.)

General:	In general, no translation problems. main problem was the number and difficulty of filters.

e) Description of problems encountered while conducting the AHM (incl. results from interviewer debriefings) (P.2)

(this could apply to e.g. comprehension of question wordings, concepts or reference periods, the retrieval or processing of the corresponding information by the respondent, if questions are sensitive or effected by social-desirability, if the answer categories are adequate, if preceeding questions have an effect, if routing or filtering is problematic, etc.)

General:	Routing from the filters is problematic (at least for a PAPI survey)
