

Methodological notes

1. Data collection was performed based on the questionnaires filled in by National House of Public Pensions (for state social insurance and farmers pensioners), Ministry of Defence, Ministry of Internal Affairs, Romanian Intelligence Service, Ministry of Culture, Insurance House of Lawyers.

2. Concepts and definitions

The total average number of pensioners includes the total pensioners from Romania, by any pension system, i.e. public system of pensions (including social support – type of pension, IOVR - disabled, veterans and war widows) and the systems not integrated into the public pension system (social insurance pensioners from the records of the Lawyers' Insurance House, the own social insurance systems of the cults recognized by law). The indicator is computed by dividing the total number of monthly paid pensioners at the number of months from the reference period.

- **Average number of social insurance pensioners** includes:
 - state social insurance pensioners;
 - pensioners from the former insurance system for farmers;
 - social insurance pensioners from Ministry of National Defence, Ministry of Internal Affairs, Romanian Intelligence Service;

 - social insurance pensioners from Insurance House of Lawyers.
- **Average monthly pension** is determined based on all amounts of pensions for all categories of pensioners – social insurance pensions, invalidity pensions, survivors pensions etc.- paid by Pensions Houses mentioned above, and is computed by dividing the entitled amounts of the paid pensioners from the reference quarter/year by the average monthly number and, also, divided by 3 (months), and, respectively 12 (months)

By category, pensions are classified as follows:
