### February 2015 compared to January 2015

The volume of construction works increased, as gross series, by 24.3%, increase highlighted in maintenance and current repairs works by 44.5% and in new construction works by 27.1%. There was a decrease of 23.4% in the capital repairs works.

By construction objects there were rises as follows: in engineering works by 33.7%, in non-residential buildings by 20.9% and in residential buildings by 6.0%.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 5.3%, increase highlighted in maintenance and current repairs works by 11.8% and in new construction works by 7.0%. There was a decrease of 26.7% in the capital repairs works.

By construction objects there were rises in engineering works by 11.5% and in non-residential buildings by 2.0%. There was a decrease of 14.1% in the residential buildings.

### February 2015 compared to February 2014

The volume of construction works increased, as gross series, by 19.7%. By structure elements there were rises in the new construction works and in maintenance and current repairs works by 24.8% each. There was a decrease of 19.5% in the capital repairs works.

By construction objects there were rises in non-residential buildings and in engineering works by 38.1% and by 20.2%, respectively. There was a decrease of 9.2% in the residential buildings.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 17.7%. By structure elements there were rises in the new construction works by 24.1% and in maintenance and current repairs works by 23.3%. There was a decrease of 13.2% in the capital repairs works.

By construction objects, the volume of construction works increased by 38.7% in non-residential buildings and by 6.7% in engineering works. There was a decrease of 8.2% in the residential buildings.

## Period 1.I-28.II.2015 compared to period 1.I-28.II.2014

The volume of construction works increased per total, as gross series, by 14.8%. By structure elements there were rises in the new construction works by 20.2% and in maintenance and current repairs works by 8.3%. There was a decrease of 2.0% in the capital repairs works.

By construction objects there were rises as follows: in non-residential buildings by 31.2%, in residential buildings by 12.3% and in engineering works by 6.3%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 14.7%. By structure elements there were rises as follows: in new construction works by 20.7%, in maintenance and current repairs works by 11.2% and in the capital repairs works by 3.1%.

By construction objects, the volume of construction works increased by 31.9% in non-residential buildings and by 13.8% in residential buildings. There was a decrease of 1.3% in the engineering works.

### Construction works indices

		FEBRUARY 2015 compared to:		- percentage-
		JANUARY 2015	FEBRUARY 2014	1.I-28.II.2015/ 1.I-28.II.2014
<b>Constructions - total</b>	B	124.3	119.7	114.8
	S	105.3	117.7	114.7
<b>- by structure elements:</b>				
New constructions	B	127.1	124.8	120.2
	S	107.0	124.1	120.7
Capital repairs	B	76.6	80.5	98.0
	S	73.3	86.8	103.1
Maintenance and current repairs	B	144.5	124.8	108.3
	S	111.8	123.3	111.2
<b>- by construction objects:</b>				
Residential buildings	B	106.0	90.8	112.3
	S	85.9	91.8	113.8
