March 2015 compared to February 2015

The volume of construction works increased, as gross series, by 47.2%, increase highlighted in capital repairs works by 136.8%, in new construction works by 43.1% and in maintenance and current repairs works by 28.3%.

By construction objects there were rises as follows: in engineering works by 53.5%, in non-residential buildings by 45.1% and in residential buildings by 30.9%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 4.4%, increase highlighted in the capital repairs works by 55.6%, in new construction works by 5.2% and in maintenance and current repairs works by 0.1%.

By construction objects there were rises in residential buildings 14.9% and in engineering works by 4.3%. Non-residential buildings decreased by 0.6%.

March 2015 compared to March 2014

The volume of construction works increased, as gross series, by 13.8%. By structure elements there were rises in capital repairs works by 14.7%, in maintenance and current repairs works by 14.3% and in new construction works by 13.5%.

By construction objects there were rises as follows: in residential buildings by 37.7%, in engineering works by 18.2% and in non-residential buildings by 1.1%.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 9.7%. By structure elements there were rises in the capital repairs works by 11.3%, in new construction works by 11.1% and in maintenance and current repairs works by 6.4%.

By construction objects, the volume of construction works increased by 36.6% in residential buildings and by 2.7% in engineering works. Non-residential buildings decreased by 0.2%.

Quarter I 2015 compared to Quarter I 2014

The volume of construction works increased per total, as gross series, by 13.4%. By structure elements there were rises in new construction works by 16.2%, in maintenance and current repairs works by 9.0% and in capital repairs works by 6.1%.

By construction objects there were rises as follows: in residential buildings by 19.9%, in non-residential buildings by 15.0% and in engineering works by 10.5%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 12.5%. By structure elements there were rises as follows: in new construction works by 16.4%, in maintenance and current repairs works by 8.0% and in the capital repairs works by 6.7%.

By construction objects, the volume of construction works increased by 19.8% in residential buildings and by 18.2% in non-residential buildings. There was a decrease of 0.2% in the engineering works.
