May 2015 compared to April 2015

The volume of construction works increased, as gross series, by 12.3%, increase highlighted in maintenance and current repairs works and in new construction works of 28.9% and of 10.0%, respectively. The capital repairs works decreased by 3.1%.

By construction objects there were rises in engineering works and in residential buildings of 19.9% and of 2.5%, respectively. The residential buildings maintained the same level as during the previous month.

As adjusted series by the number of working days and by seasonality, there was a total decrease of 2.8%, decrease highlighted in capital repairs works of 12.8% and in new construction works of 0.9%. The maintenance and current repairs works increased by 8.9%.

By construction objects, there were drops in non-residential buildings and in engineering works of 2.2% and of 1.6%, respectively. The residential buildings increased by 3.5%.

May 2015 compared to May 2014

The volume of construction works increased, as gross series, by 4.7%. By structure elements there were rises as follows: in maintenance and current repairs works of 12.9%, in capital repairs works of 8.6% and in new construction works of 0.6%.

By construction objects, the volume of the construction works increased in non-residential buildings by 19.8% and in engineering works by 6.6%. The residential buildings decreased by 17.5%.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 7.0%. By structure elements there were rises as follows: in the capital repairs works of 21.8%, in maintenance and current repairs works of 11.2% and in new construction works of 3.1%.

By construction objects, the volume of construction works increased in non-residential buildings and in engineering works by 21.0% and by 1.6%, respectively. The residential buildings decreased by 10.4%.

Period 1.I-31.V.2015 compared to period 1.I-31.V.2014

The volume of construction works increased per total, as gross series, by 10.2%. By structure elements there were rises in capital repairs works of 18.3 %, in maintenance and current repairs works of 12.3% and in new construction works of 7.9%.

By construction objects, the volume of construction works increased as follows: in residential buildings by 16.9%, in non-residential buildings by 8.2% and in engineering works by 9.4%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 10.8%. By structure elements there were rises as follows: in the capital repairs works of 21.9%, in new construction works and in maintenance and current repairs works of 10.2% each.

By construction objects, the volume of construction works increased as follows: in residential buildings by 23.3%, in non-residential buildings by 12.2% and in engineering works by 0.3%.
