## THE CONSTRUCTION WORKS INCREASED BY 13.0%

- In June 2015, the volume of construction works increased, compared to the previous month, both as gross series and as adjusted series by the number of working days and by seasonality by 21.9% and by 3.5%, respectively.
- Compared to the corresponding month of the previous year, the volume of construction works increased both as gross series and as adjusted series by the number of working days and by seasonality by 13.0% and by 13.5%, respectively.
- In Semester I 2015, the volume of construction works increased, compared to Semester I 2014, both as gross series and adjusted series by the number of working days and by seasonality by 10.3% and by 10.9%, respectively.

**Monthly evolution of construction works, by structure elements,  
according to CANE Rev. 2  
- January 2010 – June 2015 -  
(adjusted series according to the number of working days and to seasonality)**

- 2010=100 -

### June 2015 compared to May 2015

The volume of construction works increased, as gross series, by 21.9%, increase highlighted as follows: in new construction works of 24.9%, in maintenance and current repairs works of 23.8% and in capital repairs works of 4.9%.

By construction objects there were rises in engineering works and in non-residential buildings of 30.3% and of 22.4%, respectively. The residential buildings decreased by 7.9%.

As adjusted series by the number of working days and by seasonality, there was a total increase of 3.5%, increase highlighted in new construction works of 6.0%. The capital repairs works and the maintenance and current repairs works decreased by 6.5% and by 6.0%, respectively.

By construction objects, there were rises in non-residential buildings and in engineering works of 6.3% and of 4.0%, respectively. The residential buildings decreased by 26.2%.

### June 2015 compared to June 2014

The volume of construction works increased, as gross series, by 13.0%. By structure elements there were rises as follows: in new construction works of 16.4%, in maintenance and current repairs works of 10.9% and in capital repairs works of 1.8%.

By construction objects, the volume of the construction works increased in non-residential buildings by 43.8% and in engineering works by 12.8%. The residential buildings decreased by 23.9%.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 13.5%. By structure elements there were rises as follows: in new construction works of 16.6%, in capital repairs works of 12.8% and in maintenance and current repairs works of 4.7%.

By construction objects, the volume of construction works increased in non-residential buildings and in engineering works by 47.9% and by 3.3%, respectively. The residential buildings decreased by 24.4%.

## Semester I 2015 compared to Semester I 2014

The volume of construction works increased per total, as gross series, by 10.3%. By structure elements there were rises in capital repairs works of 14.0 %, in maintenance and current repairs works of 11.0% and in new construction works of 9.3%.

By construction objects, the volume of construction works increased as follows: non-residential buildings by 13.5%, engineering works by 10.1% and residential buildings by 4.9%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 10.9%. By structure elements there were rises as follows: in capital repairs works of 19.9%, in new construction works of 11.0% and in maintenance and current repairs works of 8.7%.

By construction objects, the volume of construction works increased as follows: non-residential buildings by 16.3%, residential buildings by 12.0% and engineering works by 0.8%.
