September 2015 compared to August 2015

The volume of construction works increased, as gross series, by 13.7%, increase highlighted as follows: in new construction works by 16.7%, in maintenance and current repairs works by 13.2% and in capital repairs works by 1.6%.

By construction objects there were rises of 20.6% in non-residential buildings, of 15.8% in residential buildings and of 10.3% in engineering works.

As adjusted series by the number of working days and by seasonality, there was a total increase of 0.7%, highlighted as follows: in new construction works of 4.2%. There were drops in maintenance and current repairs works and in capital repairs works of 1.8% and of 0.4%, respectively.

By construction objects, there were rises in non-residential buildings of 7.3%. There were drops in the residential buildings and in engineering works of 6.2% and of 0.9%, respectively.

September 2015 compared to September 2014

The volume of construction works increased, as gross series, by 4.4%. By structure elements there were rises as follows: in capital repairs works and in maintenance and current repairs works of 17.8% and of 12.6%, respectively. There were drops in the new construction works of 0.5%.

By construction objects, the volume of the construction works increased in engineering works by 19.1%. There were drops in residential buildings and in non-residential buildings of 12.2% and of 11.1%, respectively.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 4.0%. By structure elements there were rises as follows: in capital repairs works and in maintenance and current repairs works of 20.7% and of 11.3%, respectively. There were drops in the new construction works of 1.2%.

By construction objects, the volume of construction works increased in engineering works by 14.0%. There were drops in non-residential buildings and in residential buildings of 9.7% and of 8.1%, respectively.

Period 1.I-30.IX.2015 compared to period 1.I-30.IX.2014

The volume of construction works increased per total, as gross series, by 9.9%. By structure elements there were rises as follows: in capital repairs works of 15.9%, in maintenance and current repairs works of 13.2% and in new construction works of 7.6%.

By construction objects, the volume of construction works increased in engineering works by 15.6% and in non-residential buildings by 5.2%. There were drops in residential buildings of 0.2%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 10.5%. By structure elements there were rises as follows: in capital repairs works of 17.5%, in maintenance and current repairs works of 10.5% and in new construction works of 9.0%.

By construction objects, the volume of construction works increased as follows: non-residential buildings by 8.6%, residential buildings by 6.7% and engineering works by 6.4%.
