Additional information:

- ✓ The turnover represents the total revenue recorded by the company during the reporting period, obtained both from the main activity and the secondary activities performed by it. The turnover does not include the revenue from the sale or transfer of assets.
- ✓ The volume indices of the turnover in trade with motor vehicles and motorcycles and in the market services rendered to the population are Laspeyres type indices and are calculated under comparable prices and methodological conditions. For expressing the values of the current period in prices of the reference period the deflating price indices are used (consumer price index). The first indices obtained are at the level of class/group CANE Rev. 2, then, by successive aggregations indices at aggregate levels are obtained. The weights used for aggregation are calculated based on the turnover according to the results of the Business Structural Survey from the reference year (2015).

For the correct interpretation of results, kindly see the [Methodological Note attached to the press release on the homepage](#).

For additional information see the online TEMPO database of the INS (data for July 2019 will be available on September 17, 2019) and the statistical publication Monthly Statistical Bulletin (date of issue September 25, 2019).

The next issue of the press release will be on Monday, October 14, 2019.
