The activities of washing, cleaning (dry) of textile articles and fur products decreased by 0.4%.

#### Additional information:

- ✓ **IMPORTANT!** In order to highlight the changes in the economy structure, starting with the data release for **January 2018** reference month, the base year used for the calculation of the indices, for all short-term indicators, was changed from 2010 to 2015.
- ✓ The changing of the base year involves the updating of the weighting system, to reflect the structural modifications occurred in the national economy activities. These modifications determined the proper recalculation and revision of the data series previously published.
- ✓ These changes will appear in press releases, statistical publications published by the INS and in the TEMPO online database.
- ✓ The turnover represents the total revenue recorded by the company during the reporting period, obtained both from the main activity and the secondary activities performed by it. The turnover does not include the revenue from the sale or transfer of assets.
- ✓ The volume indices of the turnover in trade with motor vehicles and motorcycles and in the market services rendered to the population are Laspeyres type indices and are calculated under comparable prices and methodological conditions. For expressing the values of the current period in prices of the reference period the deflating price indices are used (consumer price index). The first indices obtained are at the level of class/group CANE Rev. 2, then, by successive aggregations indices at aggregate levels are obtained. The weights used for aggregation are calculated based on the turnover according to the results of the Business Structural Survey from the reference year (2015).

For the correct interpretation of results, kindly see the [Methodological Note attached to the press release on the homepage](#).

For additional information see the online TEMPO database of the INS (data for December 2018 will be available on February 15, 2019) and the statistical publication Monthly Statistical Bulletin (date of issue February 26, 2019). The next issue of the press release will be on Friday, March 15, 2019.
