#### **December 2018 as against November 2018**

As against the previous month, in December 2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), gross series, globally increased by 3.2% due to the increases registered by the sale of food, beverages and tobacco (+15.4%). Drops were registered by the retail of automotive fuel in specialised stores (-9.3%) and by the sale of non-food products (-0.2%).

As against the previous month, in December 2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), adjusted series according to the number of working days and to seasonality, globally decreased by 1.0% due to the drops registered by the sale of non-food products (-1.5%). Increases were registered by the retail of automotive fuel in specialised stores (+0.7%) and by the sale of food, beverages and tobacco (+0.3%).

#### **December 2018 as against December 2017**

As against December 2017, in December 2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), gross series, registered an increase of 4.0% due to the increases registered by the sale of food, beverages and tobacco (+4.7%), by the sale of non-food products (+4.1%) and by the retail of automotive fuel in specialised stores (+2.5%).

As against December 2017, in December 2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), adjusted series according to the number of working days and to seasonality, registered an increase of 2.7% due to the increases registered by the sale of food, beverages and tobacco (+5.1%) and by the sale of non-food products (+2.1%). The retail of automotive fuel in specialised stores remained at the same level.

## Period 1.I-31.XII.2018 as against period 1.I-31.XII.2017

As against period 1.I-31.XII.2017, in the period 1.I-31.XII.2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), gross series, registered an increase of 5.4% due to the increases registered by the sale of non-food products (+6.1%), by the sale of food, beverages and tobacco (+6.1%) and by the retail of automotive fuel in specialised stores (+3.2%).

As against period 1.I-31.XII.2017, in the period 1.I-31.XII.2018 the retail turnover volume (excluding the trade with motor vehicles and motorcycles), adjusted series according to the number of working days and to seasonality, registered an increase of 5.7% due to the increases registered by the sale of food, beverages and tobacco (+6.5%), by the sale of non-food products (+6.4%) and by the retail of automotive fuel in specialised stores (+3.3%).

### Additional information:

- ✓ **IMPORTANT!** In order to highlight the changes in the economy structure, starting with the data release for **January 2018** reference month, the base year used for the calculation of the indices, for all short-term indicators, was changed from 2010 to 2015.
- ✓ The changing of the base year involves the updating of the weighting system, to reflect the structural modifications occurred in the national economy activities. These modifications determined the proper recalculation and revision of the data series previously published.
- ✓ These changes will appear in press releases, statistical publications published by the INS and in the TEMPO online database.
- ✓ The turnover represents the total revenue recorded by the company during the reporting period, obtained from both the main activity and the secondary activities performed by them. The turnover does not include VAT and the revenue from the sale or transfer of assets.
- ✓ The turnover volume indices of the retail are Laspeyres type indices and are calculated under comparable prices and methodological conditions. For expressing the values of the current period in prices of the reference period, the deflating price indices are used (consumer price index). The first indices obtained are at the level of class/group CANE Rev. 2, then, by successive aggregations, indices at aggregated levels are obtained. The weights used for aggregation are calculated based on the turnover according to the results of the Business Structural Survey from the reference year (2015).

For the correct interpretation of the indicators, please see the [Methodological Notes attached to the press release on the homepage](#).

For more information, see the INS TEMPO online database (the data for December 2018 will be available on February 15, 2019) and the Monthly Statistical Bulletin (date of issue February 26, 2019) .

For comparable data with the other Member States of the European Union, kindly see the Eurostat press release which will be issued today, February 5, 2019 and posted at the following address: <http://ec.europa.eu/eurostat>

The next issue of the press release will be on Tuesday, March 5, 2019.
