### Additional information:

- ✓ The turnover represents the total revenue recorded by the company during the reporting period, obtained from both the main activity and the secondary activities performed by them. The turnover does not include VAT and the revenue from the sale or transfer of assets.
- ✓ The turnover volume indices of the retail are Laspeyres type indices. The first indices obtained are at the level of CANE Rev. 2 group, then, by aggregations, indices at total level are obtained. The weights used for aggregation are calculated based on the turnover according to the results of the Business Structural Survey from the reference year (2015).

For the correct interpretation of the indicators, please see the [Methodological Notes attached to the press release on the homepage](#).

For more information, see the INS TEMPO online database (the data for November 2019 will be available on January 20, 2020) and the Monthly Statistical Bulletin (date of issue January 29, 2020).

The next issue of the press release will be on Monday, February 17, 2020.
