CONSTRUCTION WORKS IN FEBRUARY 2022

- In February 2022, the volume of construction works increased, as gross series, by 30.9% compared to January 2022 and was up 1.2% as adjusted series according to the number of working days and to seasonality.
- In February 2022, the volume of construction works rose, as gross series, by 7.7% compared to February 2021 and was up 4.6% as adjusted series according to the number of working days and to seasonality.
- In the 1.I-28.II.2022 period, the volume of construction works was up 8.4% as gross series compared to the 1.I-28.II.2021 period and increased by 5.9% as adjusted series according to the number of working days and to seasonality.

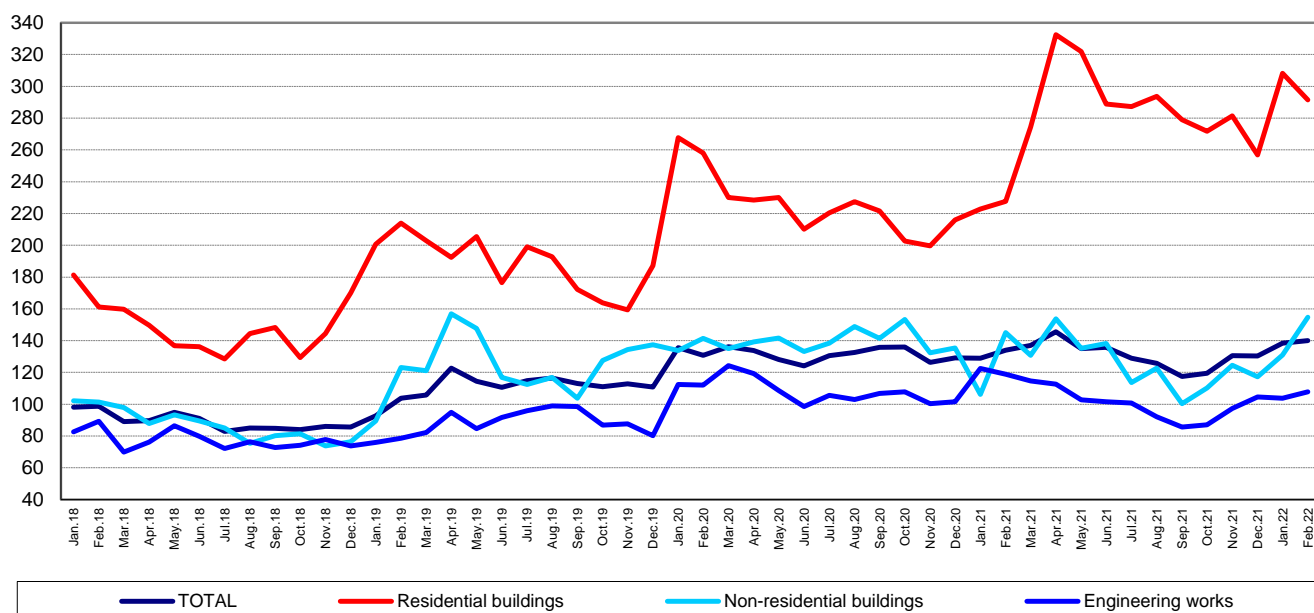

Monthly evolution of construction works, by structure elements, according to NACE Rev. 2 - January 2018-February 2022 - (adjusted series according to the number of working days and to seasonality)

- 2015=100 -

February 2022 compared to January 2022

The volume of construction works increased, as gross series, by 30.9%, an increase reflected in capital repair works (+50.0%), in maintenance and current repair works (+36.7%) and in new construction works (+26.7%).

By construction objects, the following rises were reported: for non-residential buildings (+46.9%), for engineering works (+27.7%) and for residential buildings (+21.0%).

The volume of construction works rose, as adjusted series according to the number of working days and to seasonality, by 1.2%, a rise reflected in capital repair works (+21.3%) and in maintenance and current repair works (+4.3%). The new construction works remained at the same level.

By construction objects, the volume of construction works increased for non-residential buildings (+18.2%) and for engineering works (+4.1%). The residential buildings were down 5.5%.

February 2022 compared to February 2021

The volume of construction works increased overall, as gross series, by 7.7%. By structure elements, rises were reported for maintenance and current repair works (+16.9%), for capital repair works (+16.0%) and for new construction works (+3.8%).

By construction objects, the residential buildings were up 26.0% and the non-residential buildings rose by 8.7%. The volume of construction works decreased by 3.5% for engineering works.

The volume of construction works rose overall, as adjusted series according to the number of working days and to seasonality, by 4.6%. By structure elements, increases were recorded for maintenance and current repair works (+10.8%), for capital repair works (+10.4%) and for new construction works (+1.8%).

By construction objects, the residential buildings rose by 28.0% and the non-residential buildings were up 6.7%. The volume of construction works dropped for engineering works (-9.1%).

The 1.I-28.II.2022 period compared to the 1.I-28.II.2021 period

The volume of construction works increased overall, as gross series, by 8.4%. By structure elements, rises were reported for maintenance and current repair works (+17.5%), for capital repair works (+11.8%) and for new construction works (+5.1%).

By construction objects, increases were recorded for residential buildings (+30.9%) and for non-residential buildings (+14.3%). The engineering works dropped 7.4%.

The volume of construction works was up 5.9% as adjusted series according to the number of working days and to seasonality, an increase reflected in maintenance and current repair works (+13.2%), in capital repair works (+7.1%) and in new construction works (+3.7%).

By construction objects, rises were reported for residential buildings (+33.1%) and for non-residential buildings (+13.7%). A 12.3% fall was recorded for engineering works.

Construction works indices

- percentages -

| | | FEBRUARY 2022 compared to: | | 1.I-28.II.2022/ 1.I-28.II.2021 |
|---------------------------------|----------|----------------------------|---------------|-----------------------------------|
| | | JANUARY 2022 | FEBRUARY 2021 | |
| Constructions – total | G | 130.9 | 107.7 | 108.4 |
| | S | 101.2 | 104.6 | 105.9 |
| - by structure elements: | | | | |
| New constructions | G | 126.7 | 103.8 | 105.1 |
| | S | 100.0 | 101.8 | 103.7 |
| Capital repairs | G | 150.0 | 116.0 | 111.8 |
| | S | 121.3 | 110.4 | 107.1 |
| Maintenance and current repairs | G | 136.7 | 116.9 | 117.5 |
| | S | 104.3 | 110.8 | 113.2 |
| - by construction objects: | | | | |
| Residential buildings | G | 121.0 | 126.0 | 130.9 |
| | S | 94.5 | 128.0 | 133.1 |
| Non-residential buildings | G | 146.9 | 108.7 | 114.3 |
| | S | 118.2 | 106.7 | 113.7 |
| Engineering works | G | 127.7 | 96.5 | 92.6 |
| | S | 104.1 | 90.9 | 87.7 |

G = gross series; S = adjusted series according to the number of working days and to seasonality

Additional information:

- The **construction volume indices** are determined by deflating the value data with the construction cost indices by structure element and by construction object. The construction volume indices are calculated for the overall construction branch (section F of NACE Rev. 2), by structure element (new construction works, capital repair works, maintenance and current repair works) and by construction object (residential buildings, non-residential buildings and engineering works).
- The construction works indices overall are calculated as a weighted arithmetic mean of indices by structure element or of indices by construction object.
- Beside the gross series of construction volume indices, **indices that are adjusted by number of working days and seasonality** are also calculated on a monthly basis, through the **regressive method**, using the **JDEMETRA+ version 2.2.0** software package (**the TRAMO/SEATS method**), a method recommended by the European regulations concerning short-term indicators (Council Regulation No 1165/1998).

For the correct interpretation of the indicators, please see the [Methodological Notes attached to the press release on the homepage](#).

For additional information, please see the TEMPO online database of the NIS (the data for February 2022 will be available on April 21, 2022) and the Monthly Statistical Bulletin (date of issue April 27, 2022).

For comparative data at EU level, please see the Eurostat press release to be issued on Monday, April 25, 2022 at the address <https://ec.europa.eu/eurostat/web/main>.

The next issue of the press release will be on Thursday, May 19, 2022.
