May 2016 compared to April 2016

The volume of construction works increased, as gross series, by 6.2%, increase highlighted as follows: in capital repairs works of 34.0% and in new construction works of 3.7%. There were drops of 0.3% in maintenance and current repairs works.

By construction objects, there were rises as follows: in non-residential buildings of 20.3%, in residential buildings of 3.6% and in engineering works of 0.5%.

The volume of construction works decreased, as adjusted series by the number of working days and by seasonality, by 3.0%, decrease highlighted as follows: in maintenance and current repairs works of 14.6% and in new construction works of 7.7%. There were rises of 14.2% in capital repairs works.

By construction objects, there were drops in engineering works and in residential buildings of 12.3% and of 5.5%, respectively. There were rises of 14.3% in non-residential buildings.

May 2016 compared to May 2015

The volume of construction works increased, as gross series, by 8.9%. By structure elements, there were rises as follows: in capital repairs works of 16.6%, in new construction works of 8.4% and in maintenance and current repairs works of 5.9%.

By construction objects, the non-residential buildings and the engineering works increased by 15.1% and by 9.4%, respectively. There were drops of 3.7% in residential buildings.

The volume of construction works increased, as adjusted series by the number of working days and by seasonality, by 9.4%. By structure elements, there were rises as follows: in capital repairs works of 6.9%, in new construction works of 6.4% and in maintenance and current repairs works of 4.6%.

By construction objects, the volume of construction works increased in engineering works and in non-residential buildings by 14.7% and by 10.5%, respectively. There were drops of 14.3% in residential buildings.

Period 1.I.-31.V. 2016 compared to period 1.I.-31.V.2015

The volume of construction works increased per total, as gross series, by 5.0%. By structure elements, there were rises in maintenance and current repairs works and in new construction works of 14.5% and of 3.7%, respectively. The capital repair works decreased by 4.8%.

By construction objects, there were rises in engineering works and in residential buildings of 8.8% and of 3.2%, respectively. The non-residential buildings decreased by 0.3%.

The volume of construction works increased per total, as adjusted series by the number of working days and by seasonality, by 4.7%. By structure elements, there were rises in maintenance and current repairs works and in new construction works of 16.7% and of 1.8%, respectively. The capital repair works decreased by 3.1%.

By construction objects, the volume of construction works increased in engineering works and in residential buildings by 12.4% and by 3.4%, respectively. The non-residential buildings decreased by 0.2%.
