Thousand Additional information:

*Real pension expresses the equivalent of goods and services that can be purchased or used with the average nominal net pension in a certain period of time compared to other periods, given the evolution of consumer prices index. The indicator is determined taking into account the amounts for pensions paid pensioners from state social insurance and for those from MAPN, MAI, SRI.

** Average monthly pension is computed by dividing the entitled amounts of the paid pensioners from the reference quarter by the average monthly number multiplied by 3 (months).
