## Revisions

As a result of the revision of the unadjusted series by including the estimates for Q2 2019 in the quarterly series, the seasonally adjusted series were re-estimated, without recording significant changes of the volume indices as compared to the version published in the Press release no. 170 of July 8, 2019.

The seasonally adjusted series are quarterly re-estimated due to the change in adopted models, in the number of regression factors used, in the unadjusted series and in the number of available observations.
