# **PRESS RELEASE**

No. 230/ September 8, 2020

Domain: Quarterly Gross domestic product – provisional (1) estimates

# GROSS DOMESTIC PRODUCTS IN Q2 2020 WAS, IN REAL TERMS, BY 12.3%<sup>1</sup> LOWER, AS COMPARED TO Q1 2020

- As against the same quarter of 2019, the Gross Domestic Product recorded a decrease by 10.5% for both unadjusted series and the seasonally adjusted series in Q2 2020;
- In the first semester of 2020, as against the same period of the previous year, the Gross Domestic product decreased by 4.6% for the unadjusted series and by 3.9% for the seasonally adjusted series;
- The seasonally adjusted series of quarterly Gross Domestic Product did not changed as a result of the revision of the estimates for Q2 2020, as compared to the version published in the Press release no. 214 of August 14, 2020.
- The Gross domestic product flash estimates, as well as the provisional ones, are affected by the difficulties posed by the pandemic crisis and by the establishment of the State of emergency and alert. These difficulties are connected to the collection of basic data representing entries for national accounts and have materialized by an increase of the non-response rate. To complete the information alternative data sources had been used in order to diminish, as much as possible, the impact of these effects on the quality of the produced indicators. According to current practice, the data published today will be revised, according to the Press Release Calendar and the national accounts revision policy published on NIS web-site, when new data sources become available.

The evolution of the quarterly Gross Domestic Product for the period 2018 – 2020, unadjusted and seasonally adjusted series, is presented in the table bellow.

The data of the table in Excel format

## Seasonally adjusted series

The Gross Domestic Product – seasonally adjusted data - estimated for Q2 2020 amounted to 238502.7 million lei current prices, decreasing – in real terms – by 12.3% against Q1 2020 and by 10.5% as against Q2 2019.

Table 2: GDP, in the first half of year 2020 - seasonally adjusted series

	Q1	Q2	First half of year
Millions RON, current prices	271993.6	238502.7	510496.3
In % as against the previous quarter	100.3	87.7	-
In % as against the corresponding period of			
the previous year	102.7	89.5	96.1

The data of the table in Excel format

**The Gross Domestic Product** estimated for the first half of 2020 amounted to 510496.3 million lei current prices, decreasing – in real terms – by 3.9% against the first half of 2019.

Grafic 1: GDP - Seasonally adjusted series

The data of the graph in Excel format

# **Unadjusted series**

The Gross Domestic Product estimated for Q2 2020 amounted to 224253.9 million lei current prices decreasing – in real terms – by 10.5% as against Q2 2019.

Table 3:GDP, in the first half of year 2020 - unadjusted series

	Q1	Q2	First half of year
Millions RON, current prices	215965.2	224253.9	440219.1
In % as against the corresponding period	402.4	00.5	05.4
of the previous year	102.4	89.5	95.4

The Gross Domestic Product estimated for the first half of 2020 amounted to 440219.1 million lei current prices, decreasing – in real terms – by 4.6% as against the first half of 2019.

In tables 6, 7 and 8 the information on nominal GDP, volume indices and deflators – unadjusted and seasonally adjusted series – for Q2 and the first half of 2020 is presented.

### The contribution of resources and uses to the growth rate of GDP

#### Resources

Almost all industries contributed to the GDP decrease in the first semester of 2020 as against the same period of 2019. Significant negative contributions had the following industries:

- Industry (-3.0%), with a share of 19.3% in GDP, whose activity volume decreased by 14.1%;
- Shows, culture and recreation activities; repair of households goods and other services (-1.1%), with a share of 2.8% in GDP, whose activity volume decreased by 29.1%;
- Wholesale and retail; motor-vehicles and motorcycles repair; transport and storage; hotels and restaurants (-0.9%), with a share of 20.1% in GDP, whose activity volume decreased by 4.8%.

Positive contribution were recorded by the following industries:

- Construction (+0.5%), with a share of 3.7% in GDP, whose activity volume increased by 15.5%;
- Information and communication (+0.7%), with a share of 7.2% in GDP, whose activity volume increased by 12.1%;
- Public administration and defence; social insurance of public sector; education; health and social assistance (+0.2%), with a share of 16.6% in GDP, whose activity volume increased by 1.5%.

Net taxes on products, with a share of 8.6% in GDP, contributed with -0.9% to the GDP growth rate, their volume decreasing by 9.0 %.

Gross value added	90.7	91.4	-8.9	-3.7
Net taxes on products	9.3	8.6	-1.6	-0.9
Gross domestic product	100.0	100.0	-10.5	-4.6

The data of the table in Excel format

#### Uses

From GDP uses standpoint, the decrease was mainly due to final consumption expenditure of households whose volume decreased by 5.3% contributing by -3.5% to the GDP growth rate.

Positive contribution were recorded for the following components:

- Gross fixed capital formation which contributed by +1.2% to the GDP growth rate as a result of it's volume increase by 5.8%;
- Collective final consumption expenditure of General government which contributed by +0.9% to the GDP growth rate as a result of it's volume increase by 8.7%.

The net export recorded a negative contribution to the GDP growth rate (-2.3%) being influenced by the volume decrease of exports of goods and services, by 15.1%, in correlation with a lower decrease of the volume of imports of goods and service, by 9.4%.

Tabel 5: The contribution of GDP expenditure to the nominal value and growth rate of GDP, in Q2 and in the first half of 2020

	Contribution to the nominal value of GDP - %		Contribution to the growth rate of GDP - %	
	Q2	First half of the year	Q2	First half of the year

The data of the table in Excel format

#### **Revisions**

The seasonally adjusted series of quarterly Gross Domestic Product did not changed, the revision of the estimates for Q2 2020 as compared to the "flash" estimates published by Press release no. 214 of August 14, 2020 being insignificant.

The seasonally adjusted series are quarterly re-estimated due to the change in adopted models, in the number of regression factors used, in the unadjusted series and in the number of available observations.

<sup>1)</sup> Represents the difference between taxes on product due to the State Budget (VAT, excise duties, other taxes) and product subsidies paid from the State Budget.

<sup>2)</sup> Comprises: expenditure of population households for purchasing goods and services in view to meet their members needs, the expenditure for individual consumption of public administration (education, health, social security and social activities, culture, sport, leisure activities, collection of household waste) and the expenditure for individual consumption of non-profit institutions serving households (religious organisations, trade unions, political parties, unions, foundations, cultural and sport associations).

<sup>3)</sup> Comprises the expenditure for collective consumption of public administration (general public services, national defence and territory security, public order and security, legislative and regulatory activities, research & development, etc.).

# **Supplementary information:**

For an accurate interpretation of the indicators, please see the Methodological notes.

The data on quarterly GDP – unadjusted and seasonally adjusted series – for the period Q1 1995 – Q2 2020 is published on the INS website:

#### https://insse.ro/cms/ro/content/produsul-intern-brut

The Gross Domestic Product for Q2 2020, in provisional form (2), will be published in a press release, according to the schedule found on the INS website, on October 9, 2020.

Comparative data with the other European Union Member States are to be found in the Eurostat News Release to be published on September 8, 2020 which could be found following the link:
