Revisions

The unadjusted series of Gross Domestic Product for the period 2007-2009 was revised to insure the consistency with the "General Government" sector accounts and with the Balance of Payments. The revision was based on the new macroeconomic indicator revision policy which was elaborated to comply with the Regulation (EU) 2016/2304 of 19 December 2016 on the modalities, structure, periodicity and assessment indicators of the quality reports on data transmitted pursuant to Regulation (EU) No 549/2013 of the European Parliament and of the Council.

The seasonally adjusted series of quarterly Gross Domestic Product for the previous periods did not changed significantly as a consequence of the unadjusted series and of the estimates for Q3 2018 revision as compared to the provisional (1) estimates published by Press release no. 310 of December 7, 2018 being insignificant.

The seasonally adjusted series are quarterly re-estimated due to the change in adopted models, in the number of regression factors used, in the unadjusted series and in the number of available observations.
