# **PRESS RELEASE**

No. 314 / December 8, 2020

Domain: Quarterly Gross domestic product - provisional (1) estimates

# GROSS DOMESTIC PRODUCTS IN Q3 2020 WAS, IN REAL TERMS, BY 5.6%<sup>1</sup> HIGHER, AS COMPARED TO Q2 2020

- As against the same quarter of 2019, the Gross Domestic Product recorded a decrease by 6.0% for both unadjusted series and for the seasonally adjusted series;
- In the period 1.I-30.IX 2020, as against the same period of the previous year, the Gross Domestic product decreased by 5.1% for the unadjusted series and by 4.6% for the seasonally adjusted series;
- The seasonally adjusted series of quarterly Gross Domestic Product did not changed as a result of the revision of the estimates for Q3 2020, as compared to the version published in the Press release no. 298 of November 13, 2020;
- The Gross domestic product flash estimates, as well as the provisional ones, are affected by the difficulties posed by the pandemic crisis and by the establishment of the State of emergency. These difficulties are connected to the collection of basic data representing entries for national accounts and have materialized by an increase of the non-response rate. To complete the information alternative data sources had been used in order to affect as less as possible the quality of the produced indicators. According to current practice, the data published today will be revised, according to the Press Release Calendar and the national accounts revision policy published on NIS web-site, when new data sources become available.

The evolution of the quarterly Gross Domestic Product for the period 2018 – 2020, unadjusted and seasonally adjusted series, is presented in the table bellow.

The data of the table in Excel format

The Gross Domestic Product estimated for the period 1.I-30.IX 2020 amounted to 718269.9 million lei current prices, decreasing – in real terms – by 5.1% as against the period 1.I-30.IX 2019.

In tables 6, 7 and 8 the information on nominal GDP, volume indices and deflators – unadjusted and seasonally adjusted series – for Q3 and the period 1.I-30.IX 2020 is presented.

#### The contribution of resources and uses to the growth rate of GDP

#### Resources

To the GDP decrease in the period 1.I-30.IX 2020 as against the same period of 2019 more significant negative contributions had the following industries:

- Industry (-2.4%), with a share in GDP of 20.2%, and whose activity volume dereased by 11.1%;
- Agriculture, forestry and fishing (-1.2%), with a smaller share in GDP (4.2%), but whose activity volume significantly decreased by 23.2%;
- Shows, culture and recreation activities; repair of households goods and other services (-0.9%), with a share of 2.7% in GDP, which recorded a decrease in activity volume by 27.3%;
- Wholesale and retail; motor-vehicles and motorcycles repair; transport and storage; hotels and restaurants (-0.8%), with a share of 18.5% in GDP, whose activity volume decreased by 4.2%.

A significant negative contribution had the net taxes on product (-1.0%) these ones recording a volume decrease of 10.8%.

A positive contribution to the GDP growth rate had:

- Construction (+0.5%), with a share of 4.7% in GDP, whose activity volume increased by 12.6%;
- Information and communication (+0.6%), with a share of 6.8% in GDP, whose activity volume increased by 10.3%.

#### <u>Uses</u>

From GDP uses standpoint, the decrease was mainly due to:

- Final consumption expenditure of households, whose volume decreased by 4.8%, with a contribution of -3.0% to GDP growth rate;
- Net export (-2.0%) being influenced by the volume decrease of exports of goods and services, by 12.8%, in correlation with a lower decrease of the volume of imports of goods and services (7.5%);
- gross fixed capital formation, with a contribution of +3.8%, and whose volume increased by 18.1%;
- change in inventories (-1.6%).

A positive impact on GDP growth rate had Gross fixed capital formation, with a contribution of +1.0% and whose volume increased by 4.2%.

#### **Revisions**

The seasonally adjusted series of quarterly Gross Domestic Product did not change, the revision of the estimates for Q3 2020 as compared to the "flash" estimates published by Press release no. 298 of November 13, 2020 being insignificant.

The seasonally adjusted series are quarterly re-estimated due to the change in adopted models, in the number of regression factors used, in the unadjusted series and in the number of available observations.
