

No. 54 / March 8, 2023

Domain: Quarterly Gross domestic product – provisional (1) estimates

IN THE YEAR 2022, AS AGAINST THE PREVIOUS YEAR, THE GROSS DOMESTIC PRODUCT INCREASED BY 4.8%

- Gross domestic product in Q4 2022 was, in real terms, by 1.0% bigger, as compared to Q3 2022;
- As against the same quarter of 2021, the Gross Domestic Product recorded an increase by 4.6% for unadjusted series and by 4.9% for seasonally adjusted series;
- The unadjusted series, as well as the seasonally adjusted series, of quarterly Gross Domestic Product were recalculated as a result of the revision of the quarterly estimates for 2021 for reconciling them with the semi-final annual data, published in the release no. 324 of December 21, 2022, as well as a result of the revision of the estimates for Q1-Q4 2022, being modified as compared to the version published in the Press release no. 38 of February 14, 2023.

The evolution of the quarterly Gross Domestic Product for the period 2020 – 2022, unadjusted and seasonally adjusted series, is presented in the table bellow.

Table 1: Quarterly Gross Domestic Product

		Q1	Q2	Q3	Q4	Year

The data of the graph in Excel format.

Unadjusted series

The Gross Domestic Product estimated for Q4 2022 amounted to 422332.0 million lei current prices, increasing – in real terms – by 4.6% as against Q4 2021.

Table 3: Quarterly GDP, in the year 2022 - unadjusted series

	Q1	Q2	Q3	Q4	Year
Millions RON, current prices	269937.1	331634.8	388553.5	422332.0	1412457.4
In % as against the corresponding period of the previous year	106.3	105.1	103.8	104.6	104.8

The data of the table in Excel format.

The Gross Domestic Product estimated for the year 2022 amounted to 1412457.4 million lei current prices, increasing – in real terms – by 4.8% as against the year 2021.

In tables 6, 7 and 8 the information on nominal GDP, volume indices and deflators – unadjusted and seasonally adjusted series – for Q4 and the year 2022 is presented.

The contribution of resources and uses to the growth rate of GDP

Resources

Most of industries contributed to the GDP increase in the year 2022 as against 2021. Significant positive contributions had the following industries:

- Wholesale and retail; motor-vehicles and motorcycles repair; transport and storage; hotels and restaurants (+1.2%), with a share of 18.6% in GDP, whose activity volume increased by 6.6%;
- Professional, scientific and technical activities; activities of administrative services and support services (+0.9%), with a share of 7.0% in GDP, whose activity volume increased by 13.2%;
- Information and communication (+1.3%), with a share of 6.6% in GDP, whose activity volume increased by 20.1%;
- Construction and Real estate activities recorded an equal contribution in GDP (+0.7%), with a share in GDP of 6.3% and 7.4%, an increase in activity volume by 11.2% respectively by 8.8%.

Agriculture and Industry had a negative contribution in GDP (-0.5%), due to the decreasing level of activity by 11.6%, respectively by 2.3%.

Tabel 4: The contribution of GDP resources to the nominal value and growth rate of GDP, in Q4 and in the year 2022

	Contribution to the nominal value of GDP - %		Contribution to the growtl rate of GDP - %	
	Q4	Year	Q4	Year

Gross domestic product	100.0	100.0	4.6	4.8

The data of the table in Excel format.

Uses

From GDP uses standpoint, the increase was, mainly, due to:

- Final consumption expenditure of households whose volume increased by 5.5% contributing by +3.4% to the GDP growth rate;
- Gross fixed capital formation, whose volume increased by 9.2% contributing by +2.2% to the GDP growth rate;
- Change in inventories contributing by +0.4% to the GDP growth rate, as a consequence of the increase in volume and price compared to the previous year.

Net export had a negative contribution to the GDP growth rate change (-0.8%), being influenced by the volume increase of imports of goods and services, by 9.2%, in correlation with a smaller increase of the volume of exports of goods and service, by 8.6%.

Tabel 5: The contribution of GDP expenditure to the nominal value and growth rate of GDP, in Q4 and in the year 2022

	Contribution to the nominal value of GDP - %			to the growth GDP - %

Revisions

The unadjusted series of Gross Domestic Product for 2021 was revised to insure the consistency with the annual data – semi-final version published in the Press release no. 324 of December 21, 2022. The changes in volume of the Gross Domestic Product for the quarters of 2021, the semi-final version, are due to reporting to the revised base, respectively the year 2020, the final version.

The revision was based on the new macroeconomic indicator revision policy which was elaborated to comply with the Regulation (EU) 2016/2304 of 19 December 2016 on the modalities, structure, periodicity and assessment indicators of the quality reports on data transmitted pursuant to Regulation (EU) No 549/2013 of the European Parliament and of the Council. Supplementary information regarding the new revision policy can be found on National Institute of Statistics at the following address:

https://insse.ro/cms/en/content/gross-domestic-product

As a result of the changes in the unadjusted series by revising the quarterly series for 2021 as well as by the revision of the unadjusted quarterly series for 2022, the seasonally adjusted series were re-estimated, the volume indices being revised as compared to the version published in the Press release no. 38 of February 14, 2023.

The seasonally adjusted series are quarterly re-estimated due to the change in adopted models, in the number of regression factors used, in the unadjusted series and in the number of available observations.

¹⁾ Represents the difference between taxes on product due to the State Budget (VAT, excise duties, other taxes) and product subsidies paid from the State Budget.

²⁾ Comprises: expenditure of population households for purchasing goods and services in view to meet their members needs, the expenditure for individual consumption of public administration (education, health, social security and social activities, culture, sport, leisure activities, collection of household waste) and the expenditure for individual consumption of non-profit institutions serving households (religious organisations, trade unions, political parties, unions, foundations, cultural and sport associations).

³⁾ Comprises the expenditure for collective consumption of public administration (general public services, national defence and territory security, public order and security, legislative and regulatory activities, research & development, etc.).
