*The balance indicates the perception of the companies' managers concerning the dynamics of a phenomenon, which should NOT be seen as the intensity of increase or decrease of any statistical indicator value that is produced by the NIS.*

*The balance is calculated as a difference between the percentage of respondents who chose the positive alternative of the phenomenon and the percentage of those who indicated the negative alternative.*

### Manufacturing

According to the business tendency survey of April 2022, managers from the manufacturing industry forecast a moderate growth of the production volume for the next three months (balance +11%).

Regarding the number of employees, a relative stability is estimated, the balance being +3% per total manufacturing.

For the prices of industrial products, a robust growth is forecasted for the next three months (balance +43 %).
