The balance indicates the perception of the companies' managers concerning the dynamics of a phenomenon, which should NOT be seen as the intensity of increase or decrease of any statistical indicator value that is produced by the NIS.

The balance is calculated as a difference between the percentage of respondents who chose the positive alternative of the phenomenon and the percentage of those who indicated the negative alternative.

Manufacturing

According to the business tendency survey of November 2022, managers from the manufacturing industry forecast a relative stability of the production volume for the next three months (balance -2%).

Regarding the number of employees, a relative stability is estimated, the balance being -1% per total manufacturing.

For the prices of industrial products, a growth is forecasted for the next three months (balance +37%).

Construction

According to November 2022 estimations, there will be a decrease in the production volume of the construction activity for the next three months (balance -17%).

Managers forecast a moderate decrease in the number of employees (balance -8%).

As to the prices of construction works, a growth is forecasted (balance +38%).

Retail trade

In the retail trade sector, managers estimated a growth in the economic activity for the next three months (balance +18%). The volume of orders placed by the trade units to the suppliers of goods will grow (balance +16%).

Employers forecast a growth in the number of employees for the next three months (balance +16%).

Managers of trade companies estimate a robust growth of the retail prices (balance +50%).

Services

According to November 2022 estimations, the demand for services (turnover) will register a moderate growth for the next three months (balance +7%). A relative stability is estimated for the number of employees (balance +1%).

According to the managers, the selling or invoice prices of services will grow (balance +25%).
