Methodological notes

The arrival of a tourist in an establishment of tourists' reception with functions of tourists' accommodation is registered when a person signs in the register of the respective establishment for one night or several nights' accommodation. In each establishment of tourists' reception with functions of tourists' accommodation, regardless of the number of overnight stays, the continuous stay of a tourist counts as one arrival.

The overnight stay means the 24-hours interval, starting with the admission hour of the respective establishment, for which a person signs in the register of the establishment and benefits of accommodation according to the price paid, even if the actual stay lasts less than the mentioned interval.

The net use index of accommodation places represents the relationship between the capacity of tourist accommodation in operation and its actual use by tourists within a determined period. We do the calculation by dividing the total number of overnight stays completed with the tourist accommodation capacity in operation, in the respective period.

The nomenclature of the accommodation structures was established starting from the list of authorized accommodation structures, downloaded from the website of the Ministry of Entrepreneurship and Tourism-Department for Tourism, on January 13, 2022.

The list included 13303 structures with over 10 bed places, of which 9493 accommodation structures and 3810 apartments and rooms for rent.

In June 2022, out of the total accommodation places, 2936 units were in major repairs and 2147 did not complete the questionnaire for other reasons.

For additional information, kindly see the on-line TEMPO database of INS (data for June 2022 will be available on August 2, 2022) and the statistical publication "Monthly Statistical Bulletin" (date of issue August 26, 2022).

The next issue of the press release on tourism will be on Friday, September 2, 2022.
