#### Additional Information:

##### Methodological Note

**The arrival** of a tourist in an establishment of tourists' reception with functions of tourists' accommodation is registered when a person signs in the register of the respective establishment for one night or several nights' accommodation. In each establishment of tourists' reception with functions of tourists' accommodation, regardless of the number of overnight stays, the continuous stay of a tourist counts as one arrival.

**The overnight stay** means the 24-hour interval, starting with the admission hour of the respective establishment, for which a person signs in the register of the establishment and benefits of accommodation according to the price paid, even if the actual stay lasts less than the mentioned interval.

**The net use index of accommodation places** represents the relationship between the capacity of tourist accommodation in operation and its actual use by tourists within a determined period. We do the calculation by dividing the total number of overnight stays completed with the tourist accommodation capacity in operation, in the respective period.

For additional information, kindly see the statistical publication "Monthly Statistical Bulletin" (date of issue November 27, 2017) and the on line TEMPO database of INS (data for September 2017 will be available on November 1, 2017).

The next issue of the press release on tourism will be on Tuesday, December 5, 2017.
