¹⁾ According to Greenwich. **Source:** Institute of Geography.

- Romania is situated in the geographical centre of Europe (south-east of Central Europe), in the north of the Balkan Peninsula, at half the distance between the Atlantic Coast and the Urals, inside and outside the Carpathians Arch, on the lower course of the Danube (1075 km), and is bathed by the Black Sea.
- The geometrical centre, of the country is placed at the crossing of the 45°N parallel with the 25°E meridian (100 km N-W of the country's capital. Bucharest).

Total area = 238398 km².

The total area of Romania was updated by the National Agency for Cadastre and Land Registration according to the Law on cadastre and land registration No 7/1996, with subsequent amendments.

- Romanian total borders = 3150 km.
- Neighbours: Bulgaria, Republic of Moldova, Serbia, Ukraine and Hungary.
- The Romanian coast, of the Black Sea stretches along 245 km, between the Musura stream (at the border with Ukraine) and the Vama Veche locality (at the border with Bulgaria).

Administrative organisation of the Romanian territory on December 31, 2020

| Number of counties | 42 ¹⁾ |
|------------------------------------|-------------------------|
| Number of towns and municipalities | 319 |
| of which: municipalities | 103 |
| Number of communes | 2862 |
| Number of villages 1 | 2958 |
| | |

¹⁾ Including Bucharest Municipality.

ROMANIAN'S RELIEF

It consists of three major levels, namely: the highest one in the Carpathians, the middle one which corresponds to the Sub-Carpathians, to the hills and to the plateaus, and the lowest one in the plains, the meadows and the Danube Delta. The main features of the relief units are proportionality (31% mountains, 36% hills and plateaus, 33% plains and meadows) and the concentric display of the major relief levels.

Major mountain peaks

| Name of Peak Massif Coun | | | | County | Height (m) |

 Romania's useful mineral resources are diverse: crude oil, natural gas, coal, mainly coked pitcoal, brown coal and lignite, ferrous and nonferrous ores, gold and silver deposits, bauxite, large reserves of salt, as well as numerous non-metalliferous resources.

A special category of subsoil resources are the over 2000 mineral water springs fit for consumption and medical treatment.

POPULATION

- 19328838 inhabitants, on January 1st, 2020 (usually resident population);
- Density of the usually resident population: 81.1 inhabitants / km², on January 1st, 2020.

CAPITAL: Bucharest Municipality (2155240 inhabitants, permanent resident population on July 1st, 2020), divided into six administrative sectors.

Mentioned for the first time in documents on 20.IX.1459, as residence of Vlad $\overline{\text{Tepes}}$.

It becomes the capital of the Romanian Country (Ṭara Românească) in the second half of the 17th century and the capital of Romania in 1862, being the most important political, economic, cultural and scientific centre of the country.

MAIN CITIES: Bucharest, Iași, Timișoara, Cluj-Napoca, Constanța, Craiova, Galati, Brașov, Ploiesti, Oradea.

The town situated at the highest average altitude is Predeal (Braşov county) = 1060 m.

The town situated at the lowest average altitude is Sulina (Tulcea county) = 4 m.

MAIN HARBOURS:

- at the Black Sea: Constanţa, Mangalia;
- at the Danube: Moldova Nouă, Orșova, Drobeta-Turnu Severin, Calafat, Corabia, Turnu Măgurele, Zimnicea, Giurgiu, Olteniţa, Călăraşi, Cernavodă, Hârșova, Măcin, Brăila, Galaţi, Tulcea, Sulina.

MAIN AIRPORTS: Bucharest ("Henri Coandă"-Otopeni and "Aurel Vlaicu"-Băneasa), Constanța ("Mihail Kogălniceanu"), Timișoara ("Traian Vuia"), Cluj-Napoca, Iași, Craiova, Arad, Bacău, Baia Mare, Oradea, Satu Mare, Sibiu, Târgu Mureș, Suceava, Tulcea.

OFFICIAL LANGUAGE: Romanian.

ROMANIA'S NATIONAL DAY: December 1.

ROMANIA'S FLAG: Is three coloured, the colours being placed vertically in the following order from the flagpole: blue, yellow, red.

GOVERNMENT FORM IN ROMANIA:

- Republic, according to the Constitution adopted in 1991, amended and republished in 2003 (Official Journal No 767/October 31, 2003);
- Legislative power: a bicameral Parliament (the Chamber of Deputies and the Senate);
- Executive power: a Government led by a Prime Minister appointed by the country's President;
- The President of the country is elected based on general election results by universal vote for a 5-year mandate.

NATIONAL CURRENCY: leu, with "ban" as subdivision.

The exchange rate is set on the interbank currency market on a daily basis; the reference currency is the euro. In 2020, the average exchange rate leu / euro was 4.8371.

¹⁾ On January 1st.

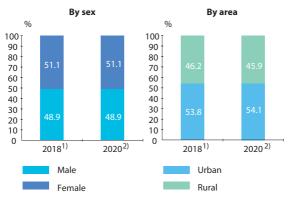

On January 1st, 2020, Romania's usually resident population was 19328.8 thousand inhabitants, of which 9.9 million women (51.1%). The negative values of the natural increase, combined with those of international migration balance, entailed a diminution with 147.9 thousand persons, of the usually resident population, during July 1st, 2018 - January 1st, 2020. The age structure of the usually resident population bears the specific imprint of the demographic ageing process, marked primarily by declining birth rates, which has determined the fall in the share of young population (0-14 years) and the absolute and relative increase in the share of older people (60 years and over). On January 1st, 2020 compared to July 1st, 2018, a slight increase in the share of young people (0-14 years) was noticed, from 15.6% to 15.7%, while the share of elderly population (aged 60 and over) considerably increased from 25.3% to 25.7%.

The adult usually resident population (15-59 years) on January 1st, 2020 represents 58.7% of the total, decreasing with 169.7 thousand persons as against July 1st, 2018. Among the adult population, the share of the age groups 30-34 years, 40-44 years, 50-54 years increased, while the share of the age groups 25-29 years, 45-49 years and 55-59 years decreased. The shares of the 15-19 and 20-24 age groups remained relatively constant.

the 15-19 and 20-24 age group's remained relatively constant.

On January 1st, 2020, the usually resident population in urban area was 10.5 million persons, accounting for 54.1% of the country's population.

Usually resident population

¹⁾ On July 1st.

²⁾ On January 1st.

Permanent resident population by age, sex and area, on July 1st

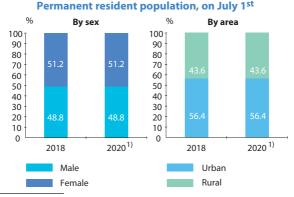

persons 2020¹⁾ 2018 2019 Total 22208803 22193286 22142153 By sex Male 10846356 10840820 10813692 Female 11362447 11352466 11328461 By age group 0-14 years 3286379 3274638 3224829 15-59 years 13829093 13770425 13722518 5194806 60 years and over 5093331 5148223 By area Urban 12524951 12521494 12492415 9649738 Rural 9683852 9671792

On July 1st, 2020, the Romania's permanent resident population was 22142.2 thousand people, a decrease with 67 thousand people compared to July 1st, 2018; this decrease was mainly due to the negative natural increase of the population.

increase of the population.
On July 1St, 2020 compared to July 1St, 2018, the share of young people (0-14 years) decreased from 14.8% to 14.6% and the share of the elderly population (aged 60 and over) increased from 22.9% to 23.5%. The adult population (15-59 years) accounts for 61.9% of total, decreasing with 107 thousand persons from July 1St, 2018. On July 1St, 2020, the permanent resident population in urban area was 12.5 million persons, accounting for 56.4% of the country's population.

Note: Permanent resident population on **July 1st**, **2020** - provisional data.

nament resident population on **July 1** , **2020** - provisional date

¹⁾ Provisional data.

The average age of the population, on July 1st

| | 2018 | 2019 | 2020 |
|---|------|------|--------------------|
| The average age of the usually resident population The average age of the permanent | 42.0 | 42.2 | 42.2 ¹⁾ |
| resident population of Romania | 41.4 | 41.6 | 41.9 ²⁾ |

¹⁾ On January 1st, 2) Provisional data.

The average age of the usually resident population of the country grew from 42.0 years (July 1st, 2018) to 42.2 years (January 1st, 2020), average age characterizing countries with "adult" population. Female population, with an average age of 43.9 years was on January 1st, 2020 older than male population by 3.3 years.

¹⁾ Provisional data.

The average age of the permanent resident population increased from 41.4 years (July 1st, 2018) to 41.9 years (July 1st, 2020). Female population, with an average age of 43.4 years was on July 1st, 2020, older than male population by 3.1 years.

In 2020, the evolution of demographic phenomenon was directly influenced by the emergence and evolution of the COVID-19 pandemic crisis, by the measures of central authorities to prevent the spread of the virus by applying the provisions of military ordinances to prevent the spread of COVID-19 by introducing restrictions on the possibility events with more than 3 people, limited travel outside the home and outside the locality, suspended activities were suspended, determined the Union of Notaries Public to postpone the deadlines for divorce cases pending cessation of the state of emergency, as well as the provisions of the Emergency Ordinances and Government Decisions during the state of emergency and the state of alert that imposed certain limitations on the number of people who may meet in public places, limiting events to a very small number of participants, as well as quarantine measures of some localities and some indoor activities have been suspended.

Note: Only live-births whose mothers' usual residences at the time of birth were in Romania and whose births were recorded by the registry courts of Romania are included; as for deaths under 1 year, only the deaths of persons whose usual residences were in Romania.

usual residences were in Komania.
For birh and mortality fates for the **2018 and 2019** years, the usually resident population on **July 1St** of each year was used and for **2020** year, the usually resident population on **January 1St** was used, populations estimated under conditions of comparability with the final results of the Population and Housing Census 2011. For marriage and divorce rates the permanent resident population at **July 1St** was used.

Source: NIS - Statistical demographic surveys.

The birth rate, the first component of the vital statistics showed for 2020 a decrease compared to the previous year and compared to 2018. Given that, on the short and medium term, mortality is not expected to contribute significantly to the reducing of the demographic decline in Romania, the birth rate remains the only component that can be acted upon, with efficient outcomes.

¹⁾ Final data.

²⁾ Semi-final data.

³⁾ Provisional data.

⁴⁾ Infant mortality rate is calculated by reporting the number of deaths of persons under1 year, who had the usual residences in Romania, to 1000 live-births whose usual residences were in Romania.

In 2020¹⁾, the number of live births with usual residence in Romania was 176.8 thousand persons, decreasing with 23.0 thousands compared to 2019 and with 26.0 thousand persons compared to 2018.

Mortality - as the second component of vital statistics - remained high in Romania. The significant increase in the level of this component should be taken into account for the demographic perspectives of Romania.

297.0 thousand persons with usually residence in Romania have died in 2020¹⁾, 37.2 thousand people less than in 2019 and 33.1 thousand people less than in 2018. The number of deaths with age under 1 year for children with usual residence in Romania, registered in 2020¹⁾, was 1095, with 56 fewer deaths compared to 2019 and with 131 less in comparison with 2018.

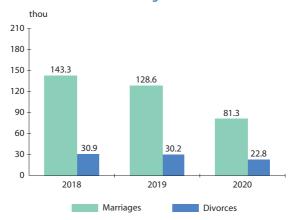

Note: For the period 2018 - 2020 are included only live births whose mothers had at the date of birth their habitual residence in Romania and whose birth was registered at the civil status offices in Romania, deaths under 1 year, respectively deaths of persons with habitual residence in Romania, whose death was registered at the civil status offices in Romania.

1) Semi-final data.

81.3 thousand marriages were concluded in 2020. Compared to 2019, the number of marriages decreased with 47.3 thousands and while compared to 2018, they decreased with 61.9 thousands.

The number of divorces registered in 2020 was 22.8 thousand divorces, decreasing by 7.4 thousand divorces (-24.5%) compared to 2019 and by 8.1 thousand divorces (-26.2%) compared to year 2018.

Evolution of marriages and divorces

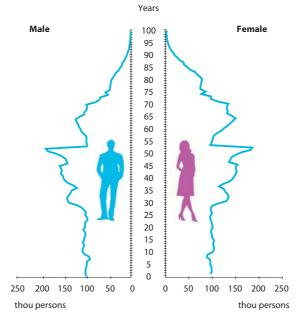

In 2019, the average life expectancy²⁾ was 72.45 years for men and 79.54 years for women, increasing compared to 2018 by 0.08 years for the male population and 0.16 years for the female population. In 2019, women had an average life expectancy 7.09 years longer than men did.

¹⁾ Provisional data.

Source: Ministry of Internal Affairs - Directorate for Persons Records and Database Administration.

In 2020³⁾ 367.6 thousand people have changed their permanent residence within the country, with 35.7 thousand people more than in 2019 and with 18.7 thousand persons more compared to 2018.

The same with previous years, in 2020, the migratory flows from urban areas (to rural and to urban areas) hold the largest shares in the structure of internal migration.

²⁾ The permanent resident population on **July 1st** of each year was used.

³⁾Provisional data.

Romanian citizens who established their permanent residence abroad number of persons

Note: Final data for 2020 will be available in July 2021.

The balance of permanent international migration was positive, the number of immigrants being 2.4 times higher than the number of emigrants. In 2019, the balance of international migration by change of usual residence was negative, the number of emigrants exceeding the number of immigrants with 31 thousands people.

In 2019, most emigrants were male, representing 54.1% of all emigrants, increasing as opposed to previous years (51.3% in 2018 and 50.7% in 2017). In 2019, 58.1% of immigrants were male, a decrease compared to 2017, when the share of male immigrants was 56.9%.

Economically active population

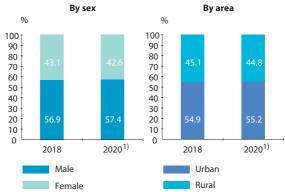

¹⁾ Provisional data.

¹⁾ According to the international definition (ILO - International Labour Office).

The employed population in 2020 was 8521 thousand people, a level close to the one of the last 2 years (8680 thousand people in 2019 and 8689 thousand people in 2018). Of those employed in 2020, 57.4% were men. Until 2002, the majority of the employed population was rural. Since 2003, most of the employed population lives in urban areas (55.2% in 2020). The category of employees predominates among the employed population (76.2% in 2020).

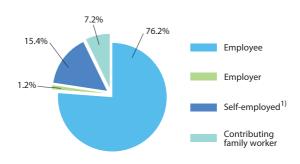

The number of unemployed persons - according to the international definition (ILO) - was in 2020, 452 thousand people, increasing compared to 2019 (+98.4 thousand). Of the total number of unemployed persons, 23.3% were young (15-24 years old).

Compared to 2019, more significant decreases in the number of employed persons were registered in the manufacturing industry (-101.9 thousand persons) and in agriculture, forestry and fishing (-96.5 thousand persons). The most significant increases compared to the previous year were registered in construction (+22.1 thousand people), trade (+38.7 thousand people), information and communications (+14.8 thousand) and public administration and defense (+12.0 thousand people).

¹⁾ Provisional data.

Structure of employment in the private sector, by main activities of national economy

Note: The private sector includes private and co-operative or community ownership

Source: Household Labour Force Survey (HLFS).

The share of employment in the private sector has decreased in recent years from 83.6% in 2014 to 82.9% in 2020. Of the total population employed in the private sector, 75.7% were working in industry, construction and services, a percentage that increased compared to 2019, when the value was 74.8%.

In 2019, the average number of employees was 5164.5 thousand people. The average number of employees increased during 2019 by 96.4 thousand people compared to the previous year.

Compared to 2018, significant increases in the average number of employees were registered in trade, construction, health and social assistance, information and communications, professional, scientific and technical activities, hotels and restaurants, transport and storage, respectively in service activities administrative and support service activities. At the opposite side, with decreases in the average number of employees were the activities of manufacturing, financial intermediation and insurance, education and extractive industry.

The distribution of employees by economic sectors in 2019 shows that 62.8% were in services (tertiary sector), increasing by 0.4 percentage points compared to 2018. In the secondary sector (industry and construction) worked 34.7% of total employees, decreasing by 0.5 percentage points compared to 2018. The share of the number of employees who worked in the agricultural branches (primary sector) slightly increased, by only 0.1 percentage points compared to the previous year (2.5%).

The private sector absorbs most of the employed labor force, so in 2019, the share of employees in the fully private sector was 73.3%, increasing compared to 2018 by 0.4 percentage points.

¹⁾ According to the international definition (ILO - International Labour Office).

²⁾ Provisional data.

The unemployment rate according to the international definition (ILO) - calculated as a proportion of the unemployed in the active population, increased, reaching in 2020 the value of 5.0% (compared to 3.9% in 2019 and 4.2% in 2018).

The ILO unemployment rate increased in 2020 compared to the previous year, for both women and men. Thus, for women there was an unemployment rate of 4.7%, increasing by 1.3 percentage points compared to 2019, and for men, the unemployment rate was 5.3%, increasing by 1.0 points percentages compared to the previous year. In 2020, the unemployment rate in urban areas was lower than the rate recorded in rural areas (4.4% compared to 5.8%). Young people aged 15-24 are the people most severely affected by the phenomenon of unemployment.

Thus, in 2020, the youth unemployment rate was 17.3% (higher value than the previous year), with quite significant differences by areas (20.1% in urban areas, compared to 16.0% in rural areas). The value of this indicator was 4.1% for people aged 25 and over.

Note: Data calculated for the working age population (15 - 64 years). The series of data have been calculated according to the usually resident population, taking into account the usual residence criterion.

Source: Household Labour Force Survey (HLFS).

In 2020, the activity rate of the working age population (15-64 years) was 69.2% (compared to 68.6% in 2019) and recorded higher levels for the male population (78.7 %, compared to 59.3% for the female population). On the two areas of residence, the indicator had quite close values: 70.2% in urban and 67.9% in rural areas.

¹⁾ According to the international definition (ILO - International Labour Office).

²⁾ Provisional data.

¹⁾ Provisional data.

The employment rate of the working age population (15-64 years) in 2020 was 65.6%, decreasing compared to the previous year (65.8%). The employment rate of the population aged 20-64 was 70.8%, with 0.8 percentage points above the national target of 70% set in the context of the Europe 2020 Strategy.

The vacancy rate is one of the indicators that express the demand for labor that manifests itself in the labor market. The average annual vacancy rate was 0.77% in 2020, 0.32 percentage points lower than in the previous year, and 1.29 percentage points compared to 2007, when the vacancy rate job vacancies recorded the highest value (2.06%).

¹⁾ Provisional data.

Source: Family Budgets Survey.

During 2018-2020 period, the main source of total household income formation was the money income, which increased from 92.2% in 2018, to 92.8% in 2020. During the same period, the income in kind had a downward trend, reaching 7.2% in 2020, mainly due to the equivalent value of the consumption of agro-food products from own resources, as well as the value of income in kind (which experienced a decrease of 0.3 percentage points as compared to 2018).

Structure of money income, in 2020 ¹⁾
- total households -

¹⁾ Provisional data.

Source: Family Budgets Survey (FBS).

In 2020, salaries and other similar income represented the most important income category, with the highest share in the money income of households (73.5%), decreasing by 0.3 percentage points as compared to 2019. A major share in the money income of households is that of social benefits (20.5%, a increase of 0.7 percentage points as compared to 2019). On the contrary, the income from agriculture, the income from independent activities and the property income have a low share in the money income of households.

Considering that in the early 2000s, compared to the previous decade, there was a revival of the real value of earnings, only in 2007 this value exceeded for the first time the one recorded in 1990 (by 11.8% compared to 1990). In 2008 there was a value of the real earnings index of 130.3% compared to 1990, and in the following years the trend was slightly decreasing.

2) Provisional data.

Source: Family Budget Survey.

In Romania, the consumption of meat and meat products is at a relatively low level as compared to the standards of developed countries. The monthly average consumption of fresh meat amounted to 3.7 kg per person in 2020. Together with meat products, the consumption of meat amounts to 5.1 kg monthly, which means a yearly average consumption of 61 kg per person.

In 2020, the consumption of alcoholic and non-alcoholic beverages had a monthly average of 6.9 litres per person for mineral water and other non-alcoholic beverages, 1.6 litres for beer, 0.8 litres for wine and 0.2 litres for plum brandy and natural brandies. As compared to 2018, a significant increase was registered for mineral water and other non-alcoholic beverages by 11.3%, unlike alcoholic beverages which have approximately the same values.

Households endowment with durable goods

| | | | |

¹⁾ Provisional data.

Source: Family Budget Survey.

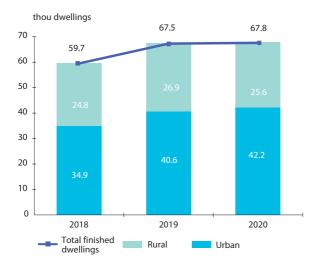

During 2018-2020 period, households' endowment with durable goods increased for most products. Thus, in 2020 compared to 2018, households' endowment with combined refrigerators – freezers had a significant increase (+5.7%) compared to the endowment of households due to a decrease in households endowment with refrigerators and freezers (+1.3%). Likewise, an important increase compared to 2018 was registered for motorcycles and mopeds, cars and bicycles (+16.7%, respectively +16.5, respective +10.7), population endowment with TV sets increased by 5.5% and with vacuum cleaners and sewing machines by 3.9% and 5.8% respectively. Households endowment with durable goods is influenced both by the financial resources of households and by the goods accumulated in the previous years, as well as by the range of goods on the market, goods that are increasingly high tech.

Evolution of the dwellings stock

¹⁾ For pensioners, state employees and employees sent for recovering the working capacity.

Source: Ministry of Labour and Social Protection.

Social assistance included social services and social assistance benefits. Their financing was, according to the law, from funds allocated from the state budget, local budgets, donations, sponsorships and other contributions of natural or legal persons, from the country and from abroad, contributions of beneficiaries, as well as other sources.

The Ministry of Labour and Social Protection is the central public authority which draws up the social assistance policy and promotes the rights of families, children, elderly persons, disabled persons and any other persons in need. In 2019, the amount spent from the state budget allocated to MLSP for social assistance was 17518847.6 lei, by 19.2% more than in 2018 and by 30.1% more as compared to 2017. The increase was mostly due to the increased quantum of certain benefits: state allowance for children, allowance for family with children support, placement allowance, some benefits paid to disabled persons.

Within total expenses for social benefits and services performed through the budget of the Ministry of Labour and Social Protection, state allowances for children prevailed (29.7% in 2018 and 36.5% in 2019), followed by the children rearing allowances (27.3% in 2018 and 25.4% in 2019).

Medical centers, health centers, diagnostic centers, multifunctional centers that offer only day hospitalization

3) services are not included. Dialysis centers are also not included. Health care centres, diagnosis and curative centres, other units assimilated to hospitals, that provide only day care hospitalisation (not continuous hospitalisation). Multifunctional health care centres, health and social care units that provide day care hospitalisation and centres that provide dialysis services are

4) not included. Including mental health centers and multifunctional health centers. Hospitals assimilated to hospitals that offer continuous hospitalization and / or day

hospitalization services are not included.
5) Including neurosis or neuropsychiatric sanatoria.

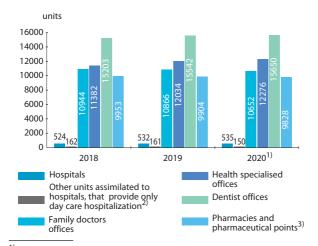

6) In the number of general practitioner offices, family doctors offices, dentist offices, health specialized offices are not included offices from other sanitary units structure, such as: polyclinics, medical civil societies, diagnosis and curative

7) centers. Including drugstores.

Source: NIS - The annual statistical survey "The activity of health care units".

In 2020, the activity of the medical units was marked by the appearance and evolution of the COVID-19 pandemic and, consequently, by the measures of the central authorities to prevent the spread of the virus. Thus, the development of the network of medical units (hospitals and other units assimilated to hospitals, medical offices, medical centers, specialized outpatient clinics, polyclinics and other medical institutions), belonging to both the public and private sectors, which provided care to the population in the year 2020 was influenced by these measures taken to ensure the provision of services for the prevention and treatment of COVID-19.

Main sanitary units evolution

1) Provisional data.

2) Health care centres, diagnosis and curative centres, other units assimilated to hospitals, that provide only day care hospitalisation (not continuous hospitalisation). Multifunctional health care centres, health and social care units that provide day care hospitalisation and centres that provide dialysis services are not included.

not included.
3) Including drugstores.

Source: NIS - The annual statistical survey "The activity of health care units".

At the end of 2020, this network included a number of 535 hospitals¹⁾, 3 more than in 2019. The units assimilated to hospitals (diagnostic centers with hospital beds and specialized centers with hospital beds) that offer only day care services were 150 hospitalization units in 2020, mostly from the network of private units, decreasing compared to 2019 when 161 units were registered. In 2020, 91 dialysis centers and their work points were registered, with 8 more units than in 2019 and 22 more units than in 2018.

In 2020, 134683 beds were available for inpatients for continuous hospitalization, with 476 more beds than in 2019, while the number of beds in sanatoriums, prevention centers and social and social units remained unchanged.

Although the total number of units providing outpatient medical services to the population increased in 2020 compared to the previous year, this increase did not follow the same trend observed in recent years. Thus, the number of main outpatient medical units increased in 2020 compared to 2019, by only 191 units, compared to 1086 in 2019 compared to 2018. By types of units, it is observed that the number of independent specialized medical offices² (12276 offices) increased by 242 units compared to 2019 and by 894 units compared to 2018, the number of specialized medical centers increased by 6 units compared to 2018. Unlike the units that offer specialized medical services, the number of family doctors' offices decreased in 2020 by 214 units compared to 2019 and by 292 units compared to 2018.

2) Services are not included. Dialysis centers are also not included.

The number of general practice medical offices, family medical offices, dental offices and specialized medical offices does not include offices from the structure of other types of health units, such as: polyclinics, civil medical societies, diagnostic

and treatment centers, a.s.o.

¹⁾ Including institutes, health centers, medical centers and medical clinics assimilated to hospitals that offer hospitalization services with continuous hospitalization or continuous and day hospitalization services. Medical centers, health centers, diagnostic centers, multifunctional centers that offer only day hospitalization services are not included. Dialysis centers are also not included.

In 2020, a number of 9828 pharmacies, pharmaceutical points and drugstores provided services to the population, with 76 fewer units than in 2019 and 125 fewer than in 2018.

The number of medical laboratories that operated in 2020 was 4336 units, 10 less than in 2019, but 56 more than in 2018.

1) Provisional data. ²⁾ Dentists excluded.

Source: NIS - The annual statistical survey "The activity of sanitary units".

The health system benefited, in 2020, from the services provided by 65.7 thousand physicians (excluding dentists), 18.5 thousand dentists, 19.5 thousand pharmacists and 152.7 thousand ancillary medical staff. A physician (excluding a dentist) had an average of 294 inhabitants, with 12 fewer inhabitants than in 2019 and 27 fewer inhabitants than in 2018. A dentist had 1043 inhabitants, with 97 fewer inhabitants than from 2019 and with 141 fewer inhabitants than in 2018.

In 2020, there were 34.0 physicians, 9.6 dentists, 10.1 pharmaceutical chemists and 79.0 ancillary medical staff per 10000 inhabitants.

²⁾ For the years 2018/2019 - 2019/2020 the usually resident population on July 1st of each year was used, and for the 2020/2021 year the usually resident population on **January 1st** was used, populations estimated under conditions of

comparability with the final results of the Population and Housing Census 2011.

3) Including the number of children in early childhood education (creches).

⁴⁾ Provisional data.

Source: Statistical survey on the activity of educational units/institutions.

The changes taking place in the educational field, in the last ten years, especially the new legal regulations in the educational field, as well as the restructuring of the national educational system have led to the reorganisation of the network of educational units in Romania.

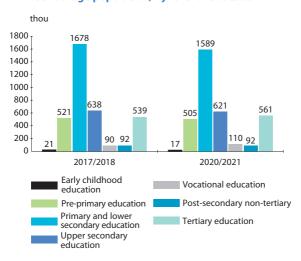

Thus, during the 2020/2021 academic year, the number of educational units decreased to 6970 units, 31 units less (by 0.4% less, respectively) as compared to the 2019/2020 academic year.

The configuration of the educational network has been correlated with the size of the school population and with the conditions offered by the existing material resources in order to ensure a high quality educational process.

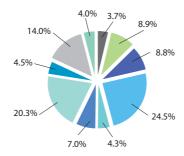

The number of pupils attending pre-university education decreased, so that during the 2020/2021 school year their number was by 0.9% less than in the 2019/2020 school year. The data on school population enrolled in tertiary education also include, beside the students attending Bachelor's degree courses, the students who attend Master's and Doctoral degree courses, and those attending post-university and post-doctoral courses. Of the total number of students and trainees enrolled in tertiary education, 74.6% are students attending Bachelor's degree courses, 21.2% are students attending Master's degree and post-university courses, while the rest are students attending Doctoral degree courses as well as advances research post-doctoral programmes, 12.2% of the total number of students enrolled in tertiary education attend private education institutions.

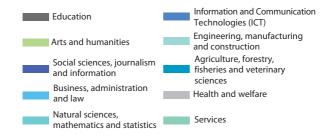

During the 2020/2021 school year, for all educational levels, the enrolment rate of the school age population (0-23 years) had different values by sex (69.6% for boys, 74.2% for girls respectively).

7) Including caravan.

In 2020, the activity of cultural-artistic units was strongly influenced by the emergence and evolution of the COVID-19 pandemic, by the measures of central authorities to prevent the spread of the virus by applying the provisions of military ordinances to prevent the spread of COVID-19 by suspending cultural activities, the provisions of the Emergency Ordinances and Government Decisions during the state of emergency and the state of alert when some cultural units remained closed, and in the case of others the access of the population was limited compared to the total capacity of the cultural units

In 2020, a number of 8846 libraries (excluding subsidiaries) operated, with 376 fewer units than in 2019 and 633 fewer units compared to 2018. The number of active users registered at libraries in 2020 was 2504 thousand people, 598 thousand less (-19.3%) compared to 2019 and 628 thousand less (-20.1%) compared to 2018.

c = Confidential data.

In 2020, the level of the gross domestic product, in nominal terms, was lei 1055548.8 million, namely 54610.0 lei per inhabitant.

In 2020, as compared to 2019, the gross domestic product, in real terms, decreased by 3.9% and the gross domestic product per inhabitant increased by 3.6%.

The evolution of the gross domestic product by activity sector had the following characteristics:

- services had the highest contribution to GDP formation, namely 60.9% of the total (lei 642804.3 million);
- industry, which contributed with 19.7% to GDP formation (lei 208320.5 million), was in second place;
- construction contributed with 6.6% to GDP formation (lei 69997.7 million);
- agriculture, forestry and fishing contributed with 3.9% to the GDP formation (lei 40494.3 million).

In 2020, the gross value added was lei 961616.8 million and represented 91.1% of the GDP.

Gross domestic product and gross domestic product per inhabitant

Note: For the years **2018 and 2019** period the usually resident population on **July 1st** of each year was used, populations estimated under conditions of comparability with the final Results of the Population and Housing Census 2011.

56

For **2020** year, the usually residential population at **January 1st**, was used.

Note: Data resulting from infra-annual statistical surveys.

In 2020, the value index of turnover in industry increased by 7.0% as against the previous year, growth sustained by mining and quarrying (-11.1%) and manufacturing (-6.9%).

In 2020 compared to 2019, the industrial production index (unadjusted series) decreased by 9.2%, as consequence of the decreases registered in three industrial sectors: the production and supply of electricity and heat, gas, steam and air conditioning (-2.7%), mining and quarrying (-9.9%), manufacturing (-10.2%).

The most important decreases in the manufacturing industry were registered in the following activities: tanning and finishing of hides and skins; manufacture of travel and leather goods, harness and footwear; preparation and dyeing of furs (-30.4%), repair, maintenance and installation of machinery and equipment (-29.0%), manufacture of clothing (-27.0%), manufacture of machinery, equipment and installations n.c.a. (-17.2%), printing and reproduction on recordings (-16.9%), manufacture of road transport vehicles, trailers and semi-trailers and manufacture of furniture (-16.4% each). Increases were recorded in the manufacture of substances and chemicals (+7.2%) and the manufacture of basic pharmaceuticals and pharmaceutical preparations (+5.0%).

¹⁾ On December 31.
2) Starting with **2019**, data on the registered means of railway transport, listed in the National Register of Vehicles -N.R.V.
3) Starting with **2019**, data that includes new subcategories.
4) Data on the activity of national operators, in the reference year, only national passenger transport.

5) Data excluding local public transport.

*) = Data under 0.5.

During 2020 compared to 2019, there was an increase in the indicator of goods transported by 3.9% for road transport, and for the other modes there were decreases, as follows: by 15.5% for rail transport, by 11.1% for maritime transport, by 8.2% for inland waterway transport and by 6.5% for transport by main oil pipelines (values calculated from "thousand tons"). Air transport decreased by 14.6% (value calculated from "tons"), compared to the previous year.

In the context of the SARS-CoV-2 pandemic, in domestic and international passenger transport were registered in 2020 compared to 2019, decreases in the number of passengers for air transport by 69.0% (value calculated from "passengers"), by 27.5% in rail transport and by 23.1% in interurban and international road transport (values calculated from "thousands of passengers"). Inland waterway transport increased by 20.7% compared to the previous year.

INTERNATIONAL TRADE IN GOODS

The main structural changes in the evolution of exports by section of the Combined Nomenclature, in 2020 compared to 2019, consist of:

- increase in share for the sections: "Food products, beverages and tobacco" - by 1.1 percentage points, "Machines and apparatus, electrical equipment; sound or image recorders and reproducers" by 0.7 percentage points;
- decrease in share for the "Mineral products" by 1.4 percentage points, section "Textiles and articles thereof" - by 0.5 percentage points.

In the evolution of imports by section of the Combined Nomenclature, in 2020 compared to 2019, the following structural changes have taken place:

- increase in share for the sections: "Products of the chemical industry"
 by 1.4 percentage points, "Machines and apparatus, electrical equipment; sound or image recorders and reproducers" by 0.7 percentage points, plant products by 0.7 percentage points;
- decrease in share for the section "Mineral products" by 2.5 percentage points, "Means and materials of transport"- by 0.9 percentage points.

NIS - Demographic statistics.

²⁾ Provisional data.

³⁾ Estimates.

⁴⁾ For the years 2000 and 2010, the live births rates were calculated by reporting the number of live births living in Romania (each year) to the number of the population after their residence on July 1st of each year.

⁵⁾ For 2015 and 2019, birth rates were calculated by reporting the number of live births with habitual residence in Romania (each year) to the number of residents on July 1^{5t} of each year, estimated in comparison with the final the final results of the Population and Housing Census - 2011.

⁶⁾ For the years **2000** and **2010** the natural population growth rates were calculated by the difference of the birth rate for live births whose mothers were domiciled in Romania at birth (each year) to the mortality rate for deaths domiciled in Romania ... (each year).

⁷⁾ For 2015 and 2019 the rates of natural population growth were calculated by the difference in the birth rate for live births whose mothers were resident in Romania at birth (each year) at the mortality rate for deaths residing in Romania (each year).
