GENERAL PRESENTATION, GEOGRAPHY AND METEOROLOGY

General presentation

MAIN AIRPORTS: Bucharest ("Henri Coandă" - Otopeni and "Aurel Vlaicu" - Băneasa), Constanța („Mihail Kogălniceanu”), Timișoara („Traian Vuia”), Cluj-Napoca, Iași, Craiova, Arad, Bacău, Baia Mare, Oradea, Satu Mare, Sibiu, Târgu Mureș, Suceava, Tulcea.

MAIN CITIES: Bucharest, Iași, Timișoara, Cluj-Napoca, Constanța, Craiova, Galați, Brașov, Ploiești, Oradea.
The town situated at the highest average altitude is Predeal (Brașov county) = 1060 m.
The town situated at the lowest average altitude is Sulina (Tulcea county) = 4 m.

CAPITAL: Bucharest Municipality (2162281 inhabitants, permanent resident population on July 1st, 2022), divided into six administrative sectors. Mentioned for the first time in documents on 20.IX.1459, as residence of Vlad Țepeș.
It becomes the capital of the Romanian Country (Țara Românească) in the second half of the 17th century and the capital of Romania in 1862, being the most important political, economic, cultural and scientific centre of the country.

GOVERNMENT FORM IN ROMANIA:

Republic, according to the Constitution adopted in 1991, amended and republished in 2003 (Official Journal No 767/October 31, 2003).

Legislative power: a bicameral Parliament (the Chamber of Deputies and the Senate);

Executive power: a Government led by a Prime Minister appointed by the country's President;

The President of the country is elected based on general election results by universal vote for a 5-year mandate.

OFFICIAL LANGUAGE: Romanian.

ROMANIA'S NATIONAL DAY: December 1st.

ROMANIA'S FLAG: Is three coloured, the colours being placed vertically in the following order from the flagpole: blue, yellow, red.

NATIONAL CURRENCY: leu, with "ban" as subdivision. The exchange rate is set on the interbank currency market on a daily basis; the reference currency is the euro. In 2022, the average exchange rate leu / euro was 4.9315.

POPULATION

19042455 inhabitants, on January 1st, 2022 (usually resident population);

Density of the usually resident population: 79.9 inhabitants / km², on January 1st, 2022.

MAIN HARBOURS:

At the Black Sea: Constanța, Mangalia;
At the Danube: Moldova Nouă, Orșova, Drobeta-Turnu Severin, Calafat, Corabia, Turnu Măgurele, Zimnicea, Giurgiu, Oltenița, Călărași, Cernavodă, Hârșova, Măcin, Brăila, Galați, Tulcea, Sulina.

Geographical position of Romania

	Extreme point (locality)	County	Longitude east ¹⁾	Latitude north
North	Horodișteea village	Botoșani	26°42'05"	48°15'06"
South	Zimnicea town	Teleorman	25°23'32"	43°37'07"
East	Sulina town	Tulcea	29°41'24"	45°09'36"
West	Beba Veche commune	Timiș	20°15'44"	46°07'27"

¹⁾ According to Greenwich.

- Romania is situated in the geographical centre of Europe (south-east of Central Europe), in the north of the Balkan Peninsula, at half the distance between the Atlantic Coast and the Urals, inside and outside the Carpathians Arch, on the lower course of the Danube (1075 km), and is bathed by the Black Sea.
- **The geometrical centre**, of the country is placed at the crossing of the 45°N parallel with the 25°E meridian (100 km N-W of the country's capital, Bucharest).
- **Total area = 238397 km²**.
The total area of Romania was updated by the National Agency for Cadastre and Land Registration according to the Law on cadastre and land registration No 7/1996, with subsequent amendments.
- **Romanian total borders** = 3150 km.
- **Neighbours:** Bulgaria, Republic of Moldova, Serbia, Ukraine and Hungary.
- **The Romanian coast**, of the Black Sea stretches along 245 km, between the Musura stream (at the border with Ukraine) and the Vama Veche locality (at the border with Bulgaria).

Administrative organisation of the Romanian territory on December 31, 2022

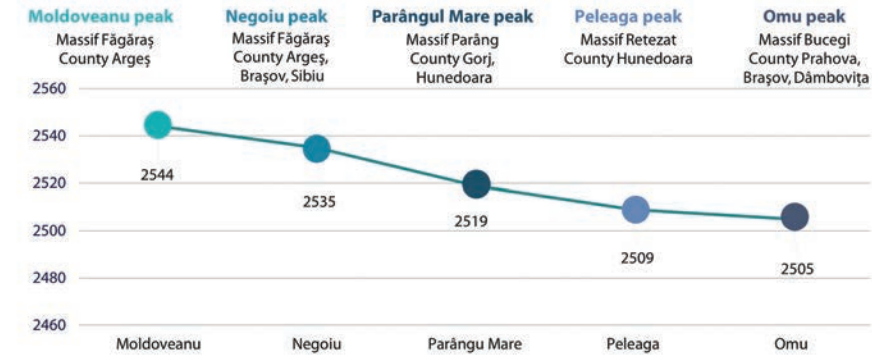

¹⁾ Including Bucharest Municipalities.

Romania's relief

It consists of three major levels, namely: the highest one in the Carpathians, the middle one which corresponds to the Sub-Carpathians, to the hills and to the plateaus, and the lowest one in the plains, the meadows and the Danube Delta. The main features of the relief units are proportionality (31% mountains, 36% hills and plateaus, 33% plains and meadows) and the concentric display of the major relief levels.

Major mountain peaks

Source: Institute of Geography.

Major rivers

Romanian **running waters** are radially displayed, most of them having their source in the Carpathians, and flow into the Danube river, which marks the southern border on a 1075 km length and flows into the Black Sea.

¹⁾ Excluding the tributaries which form the first degree basins.

Source: Institute of Geography.

Lakes are represented by natural lakes, spread across all major relief units, from glacial ones in the mountainous area (Mioarele Lake – Făgăraș at 2282 m), to river-maritime banks (Techirghiol Lake at 1.5 m) and anthropic lakes.

Anthropic lake name	Country	Area (ha)	Volume (mil. m ³)
Porțile de Fier	Mehedinți	70000.0 ¹⁾	2400.0
Ostrovu Mare	Mehedinți	7920.0	800.0

¹⁾ Between the Nera-Danube confluence and the dam (according to the data of the two hydro-power stations).

Major natural lakes

Source: Institute of Geography.

Romania's useful mineral resources are diverse: crude oil, natural gas, coal, mainly coked pitcoal, brown coal and lignite, ferrous and non-ferrous ores, gold and silver deposits, bauxite, large reserves of salt, as well as numerous non-metalliferous resources.

A special category of subsoil resources are the over 2000 mineral water springs fit for consumption and medical treatment.

Usually resident population by age, sex and area, on January 1st 2022 ¹⁾ (persons)

¹⁾ Final data.

¹⁾ Provisional data.

²⁾ Estimates.

³⁾ Data refers to the usually resident population in accordance with international requirements and regulations.

Source: Eurostat.

On January 1, 2022, Romania's usually resident population was 19042.5 thousand inhabitants, of which 9.8 million were women (51.5%). The age structure of the resident population bears the specific imprint of a demographic ageing process, marked, mainly, by the decrease in the birth rate, which determined the fall in absolute numbers of the young population (0-14 years), although a slight increase in its share is noted in total population (16.2%). The same evolution can be observed in the elderly population (60 years and over): a decrease in absolute numbers (by 24.2 thousand people) and an increase in its weight on January 1, 2022 (25.9%).

The adult usually resident population (15-59 years) on January 1, 2022 represents 57.9% of the total. Among the adult population, the share of the 50-54 age group increased and that of the 20-24, 25-29, 30-34, 35-39 and 45-49 age groups decreased.

The shares of the 15-19, 40-44 and 55-59 age groups remained relatively constant.

On January 1, 2022, the usually resident population in the urban area was 10.0 million people, representing 52.3% of the country's population.

Permanent resident population by age, sex and area, on July 1st 2022¹⁾ (persons)

¹⁾Provisional data.

On July 1, 2022, the permanent resident population of Romania was 21942.7 thousand people.

On July 1, 2022, a reduction in the share of the young population (aged 0-14 years) is observed by 0.2 percentage points to 14.5% and the share of the elderly population (aged 60 years and over) remains at 23.4%. The adult population (15-59 years) represents 62.1% of the total.

On July 1, 2022, the permanent resident population in the urban area was 12.3 million people, accounting for 56.2% of the country's population.

Note: The permanent resident population on **July 1, 2022** – provisional data.

Permanent resident population, on July 1st

¹⁾ Provisional data.

The average age of the population, on July 1st 2022

- years -

¹⁾ Final data.

²⁾ The data refer to **January 1st, 2022**.

The average age of the usually resident population on January 1, 2022 increased to 42.3 years, the average age characterizing countries with "adult" population.

Female population, with an average age of 44.0 years, was older than the male population by 3.5 years.

The average age of the permanent resident population on July 1, 2022 has increased to 42.1 years.

The female population, with an average age of 43.6 years, was older than the male population by 3.1 years.

The birth rate, the first component of the vital statistics, showed for 2022¹⁾ a decrease compared to the previous year, 168.6 thousand live births with usual residence in Romania, decreasing by 24.6 thousand people compared to 2021.

Mortality - as the second component of vital statistics - remained high in Romania 272.0 thousand people with usually residence in Romania have died in 2022¹⁾, with 63.5 thousand people less than in 2021. The number of deaths with age under 1 year for children with usual residence in Romania, registered in 2022¹⁾ was 1013 deaths, 1 death less than in 2021.

118.3 thousand **marriages** were concluded in 2022¹⁾. Compared to 2021, the number of marriages increased by 4.1 thousand.

The number of **divorces** registered in 2022¹⁾ was 23.3 thousand, decreasing by 3.7 thousand compared to 2021.

Evolution of marriages and divorces

- thou -

Marriages		Divorces
81.3	2020	22.8
114.2	2021	27.0
118.3	2022	23.3

Note: For the years **2021 - 2022** are included only live births whose mothers had at the date of birth their habitual residence in Romania and whose birth was registered at the Civil Status Offices in Romania, deaths under 1 year, respectively deaths of persons with habitual residence in Romania, whose death was registered at the civil status offices in Romania.

The marriages of persons who were, at the date of the marriage, domiciled in Romania, as well as the marriages of Romanian citizens who marry abroad and who are registered with the Romanian Civil Status Offices, are included.

The divorces of persons whose divorces have been concluded with judges, civil status or notaries public, in accordance with the provisions of Law no. 202/2010, as well as divorces of Romanian citizens who have divorced abroad, whose divorces have been transcribed at the Offices of Civil Status in Romania, are included.

¹⁾ Provisional data.

Live-births and natural increase, in 2021

Country	Live births (per 1000 inhabitants)	Natural increase
EU-27^{1),2)}	9.1	-2.7

Compared to 2021, more significant decreases in the number of employed persons were registered in agriculture (-33.0 thousand persons). Decreases in the number of employed persons were also registered in water distribution; sanitation, waste management, decontamination activities (-9.0 thousand people), hotels and restaurants (-5.6 thousand people) and the production and supply of electricity and thermal energy, gas, hot water and air conditioning (-5.2 thousands of people). The most significant increases compared to the previous year were recorded in the manufacturing industry (+16.9 thousand people), public administration and defense; social insurance from the public system (+13.8 thousand people), health and social assistance (+13.6 thousand people) and wholesale and retail trade; repair of motor vehicles and motorcycles (+13.3 thousand people).

Structure of employment in the private sector, by main activities of national economy

CANE Rev.2

Note: The private sector includes private and co-operative or community ownership types.

¹⁾ Including electricity, gas, steam and air conditioning production and supply and water supply, sewerage, waste management and decontamination activities.

Source: Household Labour Force Survey (HLFS).

Of the total population employed in the private sector, 86.7% carried out their activity in industry, construction and services, a percentage that increased compared to 2021, when the value was 86.0%.

In 2021, the average number of employees was 5094.3 thousand people. The average number of employees increased during 2021 by 62.5 thousand people compared to the previous year, as a result of the resuming the activity of certain economic and social units that temporarily suspended or ceased their activity in 2020, in the context of the pandemic COVID-19.

Compared to the previous year, increases in the average number of employees were registered in most economic activities, and the most significant were in health and social assistance (+16.9 thousand people), construction (+12.3 thousand people), information and communications (+11.0 thousand people), wholesale and retail trade; motor vehicle and motorcycle repair (+10.3 thousand people), professional, scientific and technical activities (+6.8 thousand people), transport and storage (+4.8 thousand people), administrative service activities and support service activities (+3.7 thousand people).

On the opposite side, the most important decrease in the average number of employees was observed in the manufacturing industry (-4.4 thousand people).

The distribution of employees by economic sectors shows that 63.6% were in services (tertiary sector), increasing by 0.3 percentage points compared to the previous year. 34.0% of employees worked in the secondary sector (industry and construction), 0.3 percentage points less than in 2020. The share of the average number of employees who carried out their activity in agriculture, forestry and fish farming (sector primary) was 2.4%, the same as in the previous year.

In 2022, the number of unemployed persons registered with the National Agency for Employment (NAE) was 239 thousand people.

The unemployment rate registered in 2022 reached 3.1% (provisional rate until the recalculation with the active civilian population on January 1, 2023).

Number of registered unemployed and unemployment rate

thou persons

¹⁾ Provisional data.

Source: National Agency for Employment.

In 2022, men were the majority among the registered unemployed persons, 127 thousand people (53.2%). The number of unemployed women, registered at NAE in 2022, was 112 thousand people.

The unemployment rate according to the international definition (ILO) - calculated as a proportion of the unemployed persons in the active population, was 5.6%, a value equal to the one recorded in 2021.

By sex, the ILO unemployment rate remained constant in 2022 compared to the previous year, for both women (5.0%) and men (6.0%).

By residence, the urban unemployment rate was 3.2% (compared to 3.4% in 2021), and in rural areas 8.9% (compared to 8.6% in 2021).

Young people aged 15-24 years are the people most seriously affected by the unemployment phenomenon.

Thus, in 2022, the youth unemployment rate was 22.8% (higher value than the previous year), with fairly significant differences on area (25.3% in rural areas, compared to 17.9% in the urban environment). The value of this indicator was 4.5% for people aged 25 years and over.

Activity rate

Employment rate

¹⁾ Provisional data.

Source: Household Labour Force Survey (HLFS).

The impact of long-term unemployment (the share of unemployed people aged 12 months and over in total unemployed) registered a value of 38.5% in 2022 (increasing compared to 2021). In urban areas, the indicator had a value of 45.3%, with 10.2 percentage points above the one recorded in rural areas.

In 2022, the activity rate of the working age population (15-64 years) was 66.8% (compared to 65.6% in 2021) and recorded higher levels for the male population (76.1 %, compared to 57.3% for the female population). On the two areas of residence, the indicator was higher in urban areas (70.9% compared to 61.9% in rural areas).

The employment rate of the working age population (15-64 years) in 2022 was 63.1%, increasing compared to the previous year (61.9%). The employment rate of the population aged 20-64 was 68.5%, increasing compared to the previous year (67.1%).

The vacancy rate is one of the indicators that express the demand for labor occuring on the labor market.

In 2022, the average annual vacancy rate was 0.90%, increasing by 0.04 percentage points compared to the previous year, respectively decreasing by 1.16 percentage points compared to 2007, the year in which the rate job vacancies recorded the highest value (2.06%).

Main sanitary units evolution

units

In 2022¹⁾, the network of health facilities included a number of 544 hospitals²⁾, 1 unit more than in 2021 and 9 units more than in 2020. Units assimilated to hospitals³⁾ that offer only day care services were 162 units in 2022, mostly from the network of private units, slightly increasing compared to 2021 when 160 units were registered.

In 2022, 95 dialysis centers and their work points were registered, 2 units more than in 2021.

At the end of 2022, 135837 beds²⁾ were available for inpatients for continuous hospitalization, 752 more beds than in the previous year, they benefited from 3452 beds in medico-social units, and the same number of beds in balneary sanatoria (including neurosis and neuropsychiatry sanatoria), in tuberculosis sanatoria and prevention centers, as in 2021.

The total number of outpatient units has increased in 2022 compared to the previous year and as well as compared to 2020. The most significant increases in the number of outpatient medical units were recorded in independent specialized medical offices⁴⁾, which registered in 2022 a number of 13740 units (188 more compared to 2021 and 1464 compared to 2020) and to independent dental offices, which in 2022 registered a number of 16341 units (164 more compared to of 2021 and by 691 compared to 2020).

Decreases were recorded in the number of independent family medical offices⁴⁾ by 26 units compared to 2021 and by 208 units compared to 2020.

In 2022, a number of 9885 pharmacies, pharmaceutical points and drug stores provided services to the population (40 units less than in 2021 and 57 units more than in 2020).

During the 2022/2023 academic year, the number of educational units increased to 7072 units.

The configuration of the educational network has been correlated with the size of the school population and with the conditions offered by the existing material resources in order to ensure a high-quality educational process.

The number of pupils attending pre-university education decreased, so that during the 2022/2023 school year their number was by 0.7% less than in the 2021/2022 school year.

The data on school population enrolled in tertiary education also include, beside the students attending Bachelor's degree courses, the students who attend Master's and Doctoral degree courses, and those attending post-university and post-doctoral courses. Of the total number of students and trainees enrolled in tertiary education, 76.1% are students attending Bachelor's degree courses, 19.8% are students attending Master's degree and post-university courses, while the rest are students attending Doctoral degree courses as well as advances research post-doctoral programmes. 11.7% of the total number of students enrolled in tertiary education attend private education institutions.

During the 2022/2023 school year, for all educational levels, the enrolment rate of the school age population (0-23 years) had different values by sex (68.8% for boys, 73.3% for girls, respectively).

ECONOMY, ENVIRONMENT AND SOCIAL RESOURCES

Prices

In 2022, the annual average inflation rate was 13.8%, being influenced mainly by the increase in the prices of electric energy, gas and central heating, fuels, food products and of the water supply, sewage collection, refuse collection services. The upward trend was more pronounced for the consumer prices of food products, the corresponding annual average index being 115.69%, 12.45 percentage points higher than the same index from 2021. In the case of non-food products, the average annual index from the year 2022 was 114.74%, and the one for services reached the value of 107.75%.

Evolution of consumer price, real earnings¹⁾ and yearly average exchange rate indices

¹⁾ Operative provisional data, excluding the earning of employees in the economic units having less than 4 employees.

In 2022, the industrial production price indices by CANE Rev. 2 divisions compared to the overall index of industrial production prices recorded the following development (under the conditions of keeping the basis for comparison - 2015 = 100):

- the industrial production and supply prices for electricity, gas, steam and air conditioning production, as well as the price indices of industrial production in the extractive industry increased by 181.3 percentage points, respectively by 51.4 percentage points;
- the industrial production prices for water distribution; sanitation, waste management, decontamination activities, as well as the price indices of industrial production in the manufacturing industry decreased by 39.8 percentage points and respectively by 33.9 percentage points.

National accounts

In 2022, the level of the gross domestic product, in nominal terms, was lei 1409783.9 million, namely 74033.7 lei per inhabitant.

In 2022, as compared to 2021, the gross domestic product, in real terms, increased by 4.7% and the gross domestic product per inhabitant increased by 5.2%.

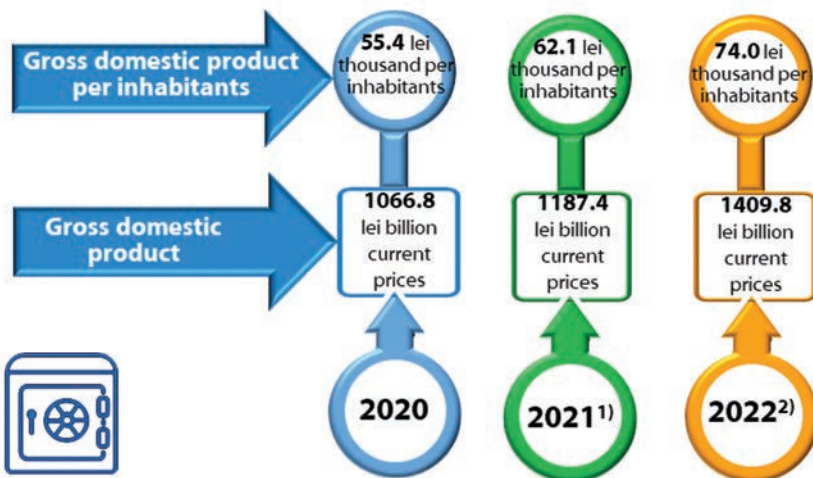

The evolution of the gross domestic product by activity sector had the following characteristics:

- services had the highest contribution to GDP formation, namely 57.7% of the total (lei 812181.5 million);
- industry, which contributed with 22.5% to GDP formation (lei 317539.7 million), was in second place;
- construction contributed with 6.3% to GDP formation (lei 89570.2 million);
- agriculture, forestry and fishing contributed with 4.5% to the GDP formation (lei 63038.2 million).

In 2022, the gross value added was lei 1282329.6 million and represented 91.0% of the GDP.

185.4

Note: Data resulting from infra-annual statistical surveys.

In 2022, the value index of turnover in industry increased by 24.5% as against the previous year, growth sustained by mining and quarrying (+77.6%) and manufacturing (+22.8%).

In 2022, the industrial production index (unadjusted series) decreased by 1.8%, as consequence of the decreases registered in the production and supply of electricity and heat, gas, steam and air conditioning (-9.4%), mining and quarrying (-2.8%) and manufacturing (-0.4%).

The most important decreases in the manufacturing industry were registered in the following activities: manufacture of chemicals and chemical products (-22.1%), manufacture of basic metals (-15.1%), manufacture of wood and cork products, excepting furniture (-13.4%), manufacture of electrical equipment (-5.4%), furniture manufacture (-5.3%), manufacture of wearing apparel (-4.7%), manufacture of rubber and plastic products (-4.3%).

Increases were recorded in: repair, maintenance and installation of machinery and equipment (+30.5%), tanning and dressing of leather, manufacture of travel and leather goods, harness and footwear (+20.7%), printing and reproduction of records (+17.3%), manufacture of coke and refined petroleum products (+12.6%), other industrial activities n.e.c. (+10.5%), manufacture of machinery and equipment n.e.c. (+9.9%), manufacture of other transport equipment (+5.9%), manufacturing of basic pharmaceutical products and pharmaceutical preparations (+5.7%).

euro million

[illegible]¹⁾ *Provisional data.*

The main structural changes in the evolution of exports by section of the Combined Nomenclature, in 2022 compared to 2021, consist of:

- increase in share for the section “Mineral products”- by 4.3 percentage points;
- decrease in share for the sections: “Machinery and mechanical appliances, electrical equipment; sound and image recorders and reproducers” – by 2.5 percentage points, “Base metals and articles of base metal” – by 0.7 percentage points, “Transport means and materials” - by 0.6 percentage points.

In the evolution of imports by section of the Combined Nomenclature, in 2022 compared to 2021, the following structural changes have taken place:

- increase in share for the section “Mineral products” - by 4.4 percentage points;
- decrease in share for the section “Machinery and mechanical appliances, electrical equipment; sound and image recorders and reproducers” – by 2.0 percentage points, “Plastics, rubber and articles thereof” – cu 0.7 percentage points.
